Stark County Community Health Assessment Advisory Committee

The Stark County Community Health Assessment (CHA) Advisory Committee, referred to as the Advisory Committee from this point forward, is made up of a variety of agencies and volunteers in the community, including: Access Health Stark County (AHSC); Alliance City Health Department (ACHD); Alliance Family Health Center (AFHC); Aultman Health Foundation; Aultman Hospital; Aultman Alliance Community Hospital; Aultman Specialty Hospital; Beacon Charitable Pharmacy; Canton City Public Health (CCPH); Cleveland Clinic Mercy Hospital; Domestic Violence Project Inc (DVPI); Educational Services Center; Jackson Twp Fire; Lifecare Family Health and Dental Center; Massillon City Health Department (MCHD); Meals on Wheels Northeast Ohio; My Community Health Center (MCHC); OSU Extension; Salvation Army of Canton Citadel; Stark Community Foundation; StarkFresh; Stark Parks; Stark County Community Action Agency (SCCAA); Stark County Family Council; Stark County Health Department (SCHD); Stark County Job and Family Services; Stark County Mental Health & Addiction Recovery (StarkMHAR); United Way of Greater Stark County; and Youngstown State University (YSU).

The following individuals have been involved in the development of the 2022 CHA:

(Chair) Kay Conley, SCHD

Abigail Jenkins, SCHD

Adrienne Price, United Way

Allison Esber, StarkMHAR

Amanda Kelly, SCHD

Amanda Nelson, AFHC

Amy Antonacci, Aultman Alliance

Amy Krebs, Stark Community Foundation

Anju Mader, StarkMHAR

Audrey Sylvester, MCHD

Brianna Hill, DVPI

Carol Risaliti, Beacon Charitable Pharmacy

Chelsea Sadinski, SCHD

Cindy Hickey, Cleveland Clinic Mercy

Cindy Linger, AHSC

David Green, Stark Parks

Dawn Miller, CCPH

Dan Gichevski, Stark County Family Council

Elizabeth Fiordalis, Cleveland Clinic Mercy

Jessica Boley, CCPH

Jim Adams, CCPH

Julie Donant, DVPI

Kaitlyn Moyes, Salvation Army of Canton

Kelly Potkay, SCHD

Kristen DeDent, Aultman Specialty Hospital

Liz Edmunds, Aultman Health Foundation

Leslie Shaffer, ACHD

Melissa Warrington, Aultman Hospital

Nicolette Powe, YSU

Randy Flint, ACHD

Rob Knight, CCPH

Rodney Reasonover, SCCAA

Serena Draper Hendershot, CCPH

Stephanie Wheeler, Cleveland Clinic Mercy

Tasha Catron, SCHD

Terri Argent, MCHD

Terry Regula, MCHC

Tom Phillips, StarkFresh

Yvette Graham, OSU Extension

Community Health Assessment Model & Framework

In 2018, the Advisory Committee adopted the Mobilizing for Action through Planning and Partnerships (MAPP) Model. MAPP is a community-wide strategic planning process that assists communities with prioritizing public health issues, identifying resources for addressing those issues, and developing a shared, long-term Community Health Improvement Plan (CHIP). MAPP is an evidence-based approach to improve public health practice that includes six phases and four assessments. The three significant components underlining the foundation of MAPP are strategic planning, collaboration, and quality improvement.

In 2022, the Advisory Committee began utilizing the Culture of Health Action Framework, developed by the Robert Wood Johnson Foundation. The framework identifies priorities, organized under distinct Action Areas, for driving measurable, sustainable progress and improving the health and well-being of all people. The Culture of Health Action Framework focuses on four areas:

1. Making Health a Shared Value
2. Fostering Cross-Sector Collaboration
3. Creating Healthier, More Equitable Communities
4. Strengthen Integration of Health Services and Systems

Executive Summary

In 2010, the Stark County Health Department began facilitating the community health assessment (CHA) process to meet requirements of the Affordable Care Act of 2010 for nonprofit hospitals and Public Health Accreditation Board standards for health departments. The CHA process is supported and guided by local health departments, health care systems, mental health organizations, social service agencies, and non-profit organizations. The committee meets quarterly to:

- Review data and assist in the development of the CHA
- Discuss the work being accomplished within the community that directly aligns to the priority health areas within the Community Health Improvement Plan
- Organize the Health Improvement Summit
- Identify emerging health issues
- Determine the best approach to eliminate health inequities

This report begins the 3-year cycle and will include the release of the Community Health Improvement Plan (CHIP) in 2023. The Center for Marketing and Opinion Research (CMOR) was selected by the Advisory Committee to conduct data collection and analysis for the CHA through four project phases.

1. The first phase of the project, the Stark Poll, consisted of a random sample telephone survey of Stark County households. This method was used to ensure representativeness of the population and to warrant statistical validity. The final sample size was 600 which resulted in an overall sampling error of +/- 4.0% within a 95% confidence level. The questions on the Stark Poll focused primarily on mental health and addiction.
2. The second phase of the project, Secondary Data Analysis, consisted of reviewing and analyzing secondary data sources to identify priority areas of concern when compared to survey data
3. The third phase of the study, a Community Health Leader Survey, consisted of a web survey of community leaders who are knowledgeable about public health. A total of 125 community health leaders completed the web survey.
4. The fourth phase includes the Maternal Health Community Focus Group, which was a facilitated discussion with a demographic mix of Stark County women of childbearing age. The five participants were all women ages 18 to 44 who live in Stark County. The group consisted of participants of different races and backgrounds, with and without children, and living in urban, suburban, and rural areas.
5. The fifth and final phase, was the Voices of Stark County Report, which consisted of data from six community meetings and 15 small focus groups. A total of 167 individuals participated. Voices of Stark County Report was compiled by the Behavioral Health Access and Integration Collaborative.

After gathering data, CMOR compiled the information, by source into a report narrative, with supporting charts and tables. When available, data was compared to previous year's information and other geographic areas such as Ohio or the United States. Analysis included survey data, and health and demographic data. Utilizing all available data, CMOR identified priority health needs for the county including (in alphabetical order):

Contributing Factors to Health Challenges

There are a number of factors that affect the health of a community. When asked what is the most important health related issue or challenge facing the county right now, nearly a third of community leaders, (32%), mentioned social determinants of health. This included transportation, affordable and available housing, access to food, childcare, and violence. Community leaders were also asked to list some problems, barriers, or gaps in services that prevent residents from receiving health related care and services they need. The most common barriers mentioned were transportation issues (42%), lack of awareness of available programs and resources (33%), cost (27%), and a limited workforce (22%).

In Stark County and across the state, life expectancy goes down as poverty goes up, according to an analysis by The Center for Community Solutions. For example, four miles could mean a difference of 16.2 years in life expectancy between a neighborhood on the east side of Canton and a neighborhood near the center of North Canton. Where you grow up and where you live have been shown to be correlated with health, social, and economic outcomes including employment, chronic disease, kindergarten readiness, and lead poisoning (Protecting Stark's Future, 2020). Stark County is unique in that it includes multiple urban areas, as well as suburban and rural communities. Residents who live in urban communities, like Canton, Massillon and Alliance, tend to experience higher rates of stress related illnesses and mental health issues (*Peen et al, 2010*) and higher rates of cocaine and heroin addiction (*SAMHSA, 2012*). Residents of the county's suburban areas generally do not have access to the same quality or selection of health care providers as those who live in an urban setting. However, the percentage of the population in poverty is much higher in the county's urban zip codes, particularly in Canton, than in other areas (*Source: U.S. Census Bureau 2021*).

Income is another contributing factor to the county's health challenges. In Stark County, the annual average household income is \$55,045. The average household income in Canton is \$32,735. In some Canton neighborhoods, like the Shorb neighborhood, household income is less than \$25,000. There, families pay an average of \$705 in rent each month compared to the county average of \$752, despite the neighborhood's high rate of poverty and violent crime (United Way of Greater Stark County, 2022). Residents in communities with the lowest income levels have the poorest health and the most difficulty gaining access to health care. Poverty levels for children in the county are slightly higher than poverty levels for the state and have remained relatively unchanged over the past 5 years. When looking specifically at children under the age of 5, the percentage is slightly higher for the county (23.7%) than the state as a whole (21.8%) (*Source: U.S. Census Bureau 2021*). In addition, 82% of community leaders felt that it was very important to address people living in poverty.

A closer look at the data reveals concerning racial disparities. Black children in Canton are about 1.5 times more likely to live in poverty than their non-Hispanic white peers. However, poverty isn't just a problem for the City of Canton. Of the nearly 20,000 children living below poverty in Stark County in 2018, around 9,000 or 47% resided in communities outside the city of Canton (Protecting Stark Future, 2020). In terms of poverty, Black and multi-racial respondents had the highest poverty levels (35.3% and 34.3%) followed by Hispanic or Latino (28.0%) (*Source: U.S. Census Bureau 2021*). In addition, 72% of community health leaders felt that it was very important to address minority populations. Educational attainment also contributes. The percentage of the population with a Bachelor's degree or higher is significantly higher in the state than it is in the county, 28.9% compared to 23.5% (*Source: U.S. Census*

Bureau 2021). In Stark County, the lower the education level, the higher the poverty level for that demographic group (poverty rate for those with less than a high school diploma was 24.6% compared to 2.9% for college graduates) (Source: U.S. Census Bureau 2021).

The aging population is also a contributing factor in the county’s health challenges that this is likely to grow in importance over the next few years. Currently, the median age in the county, 42.1, is higher than the median age of 39.4 for the state. Also, 19% of households in the county have someone in the household aged 65 or over (Source: U.S. Census Bureau 2021).

CHA Timeline

Please Note: The Advisory Committee implemented a 5-year assessment process during the first cycle (2010), then moved to a 4-year cycle (2015) to align with the local hospitals and is currently transitioning to a 3-year cycle (2019) to better align with the state’s assessment process.

Process for Identifying Priority Health Needs

Analysis for the CHA included survey data in conjunction with health and demographic data. Using all data available, CMOR confirmed the five priority community health needs for the county that were identified through the prior CHA process. The data is included in this document.

Priority Health Needs

This section presents a summary of the priority health needs for Stark County (*in alphabetical order*). For each area, data is given to support the identified health need. The priority health needs were identified after analyzing multiple sources of data as outlined in the Research Methodology appendix. The five priority health need areas were identified because they were common themes that appeared throughout the multiple sources of data and had adequate support to identify them as a significant issue.

ACCESS TO HEALTH CARE

HEALTH NEED: A large portion of county residents still do not have access to affordable basic health care services. Access to medical specialists and mental health professionals were also issues.

Progress since last CHA

- 24% of community leaders reported the issue of *access to health care* was worse than it was three years ago, 41% reported that the issue was better.
- 49% of community leaders felt there has been moderate or major progress in *increasing the number of residents who have health insurance or Medicaid*, 9% said there was minor progress. No one said there was no progress.
- 42% of community leaders felt there has been moderate or major progress in *increasing the number of residents who have a primary care provider*, 14% said there was minor progress. 3% said there was no progress.
- 28% of community leaders felt there has been moderate or major progress in *increasing the number of residents who have access to reliable transportation*, 26% said there was minor progress. 13% said there was no progress.
- The following chart summarize data gathered in 2022 from the Community Leader Survey and indicate community leader’s perceived progress on key measures on this priority area over the last three years.

Community Leader: Perceived Progress on Key Measures

Access to Care

Continuing Support for Access to Health Care as a Focus Area

- On a 10-point scale in which 1 was 'Not at all important' and 10 was 'Very important', access to health care was given an average importance rating of 8.82 by community health leaders, the third highest average importance of the five health related issues from the last CHA cycle.
- 45% of community leaders reported that there are not enough services and programs available in Stark County to address access to care issues. When asked what was missing to address this issue, the following were mentioned most often: more providers and location, transportation and other social determinants, culturally competent providers and care, lack of information or knowledge of available services, and sites that offer comprehensive services.
- Just 14% of community leaders agreed that "People in the community know about the health services and options that are available to them."
- Less than half of community leaders, (44.4%), agreed that "*Stark County has the needed programs and resources to address health related issues.*"
- Less than half of community leaders, (48.0%), agreed that "*Residents in Stark County are able to access a primary care doctor when needed.*"
- Less than a third of community leaders who were surveyed, 33%, agreed that "*Residents in Stark County are able to access a dentist when needed.*"
- A quarter of community leaders, (24.8%), agreed that "*Transportation services for medical/mental health appointments are available for residents in Stark County when needed.*"
- Nearly one-sixth of Stark County youth, (14%), have not always been able to get medical or psychological care when they thought they needed it during the school year (Source: *Northeast Ohio Youth Health Survey 2021*).

ADDICTION

HEALTH NEED: Unintended drug overdose deaths are on the rise in Stark County. In addition, a high level of middle and high school students in the county reported using some kind of illegal substance in their lifetime. Excessive alcohol and drug use can lead to an increased risk of other health problems such as injuries, violence, liver disease, and cancer.

Progress since last CHA

- 64% of community leaders reported the issue of **addiction** was worse than it was three years ago, 11% reported the issue was better.
- 22% of community leaders felt there has been moderate or major progress in **reducing overdose deaths**, 30% said there was minor progress. 20% said there was no progress in this area.
- 17% of community leaders felt there has been moderate or major progress in **reducing youth alcohol and drug use**, 25% said there was minor progress. 16% said there was no progress in this area.
- The chart on the next page summarize data gathered in 2022 from the Community Leader Survey and indicate community leader's perceived progress on key measures on this priority area over the last three years.

Community Leader: Perceived Progress on Key Measures

Continuing Support for Addiction as a Focus Area

- Nearly a quarter of community leaders, (23%) named addiction and overdoses as the most important health related issue or need in Stark County right now. This included the opiate epidemic, increase in overdoses, and the need for more addiction services and locations for sober living.
- On a 10-point scale in which 1 was 'Not at all important' and 10 was 'Very important', addiction was given an average importance rating of 9.08 by community health leaders, the second highest average importance of the five health related issues from the last CHA cycle.
- 63% of community leaders reported there are not enough services and programs available in Stark County to address addiction issues. When asked what was missing to address this issue, the following were mentioned most often: more providers and locations, community education and information to reduce stigma, a workforce or staffing shortage, culturally competent providers and care, and not knowing where to go for help.
- 80% of community leaders felt that it was very important for the CHNA Advisory Committee to address people addicted to drugs or alcohol.
- When asked to rate their level of agreement with five statements about addiction, Stark County residents were most likely to agree that addiction can affect anyone (92.6%) and addiction is a disease (62.9%) (Source: *Stark Poll 2021*).
- Less than half, (43.1%), felt marijuana use was a serious problem, about the same as 42.7% in 2020. More than a quarter (29.2%) said marijuana was not a problem at all in 2021 (Source: *Stark Poll 2021*).
- When asked to rate the seriousness of underage drinking in Stark County, about a quarter of Stark County residents (25.7%) said it was a very serious problem. Nearly half (46.4%) said it was moderately serious (Source: *Stark Poll 2021*).
- Respondents were asked to rate how easy it is for youth to obtain alcohol in their community. More than half (63.1%) said it was either extremely easy (31.6%) or slightly easy (31.5%) (Source: *Stark Poll 2021*).
- 34% of driving deaths in Stark County in 2020 had alcohol involvement (Source: *County Health Ranking 2020*).
- The number of unintentional drug overdose deaths in Stark County has increased steadily since 2013, more than doubled from 12.4 to 27.0 (Source: *Ohio Department of Health 2013-2020*).
- Nearly a third of Stark County middle and high school students have used some illegal substance at some point in their lifetime. Nearly a sixth, 13%, have used a substance in the past thirty days. Alcohol and marijuana were the most common substances used (Source: *Northeast Ohio Youth Health Survey 2021*).
- Nearly a quarter of Stark County middle and high school students, (24.1%), reported that someone in their household had used a substance, not including alcohol, during this past school year. Marijuana was the most common substance used (Source: *Northeast Ohio Youth Health Survey 2021*).

INFANT MORTALITY AND MATERNAL HEALTH

HEALTH NEED: Although, Black and African American families continue to experience higher rates of infant loss, at times over double the rate of Stark County as a whole, the county has been seeing gradual improvements in the overall infant mortality rate. Premature and low birth weight births are a large contributor to the infant mortality rate which is influenced by maternal health.

Progress since last CHA

- 11% of community leaders reported the issue of *infant mortality and maternal health* was worse than it was three years ago, 59% reported that the issue was better.
- 55% of community leaders felt that there has been moderate or major progress in *reducing the overall infant mortality rate*, 22% said there was minor progress. 3% said there was no progress in this area.
- 30% of community leaders felt that there has been moderate or major progress in *reducing disparity/inequality rate ratio*, 21% said there was minor progress. 20% said there was no progress in this area.
- The following chart summarize data gathered in 2022 from the Community Leader Survey and indicate community leader's perceived progress on key measures on this priority area over the last three years.

Community Leader: Perceived Progress on Key Measures

Infant Mortality

Continuing Support for Infant Mortality and Maternal Health as a Focus Area

- On a 10-point scale in which 1 was 'Not at all important' and 10 was 'Very important', infant mortality and maternal health was given an average importance rating of 8.77 by community health leaders, the fourth highest average importance of the five health related issues from the last CHA cycle.
- 27% of community leaders reported there are not enough services and programs available in Stark County to address infant mortality and maternal health issues. When asked what was missing to address this issue, the following were mentioned most often: community education, more providers and locations, and addressing social determinants of health.
- 83% of community leaders felt it was very important for the CHNA Advisory Committee to address infant mortality and maternal health.
- Less than half of community leaders, (40.8%), agreed that "Family planning services are accessible and available to adequately address the reproductive health needs in the community."

- Less than three-quarters, (69%), of birthing parents in Stark County accessed prenatal care in the first trimester in 2021 (Source: *Ohio Department of Health 2021*).
- The infant mortality rate in 2019 for all races (5.4) is much higher than the rate for White babies in Stark (3.8) (Source: *Ohio Department of Health 2019*).
- When using three-year groupings (2019-2021), infant mortality rates for Black babies is more than twice as high as White babies, 5.26 compared to 12.80 (Source: *Ohio Department of Health 2022*).
- Teen birth rates for non-Hispanic Black teenagers are more than three times higher than birth rates for non-Hispanic White teens, 13.2 compared to 74.2. For the Hispanic population, teen birth rates were significantly higher, 74.2 (Source: *Ohio Department of Health 2022*).
- In the maternal health focus group, cost was mentioned in nearly every aspect of the focus group as having a negative effect on a women's ability to get the healthcare they need.
- Another common theme during the maternal health focus group was that women tend to have multiple responsibilities and tend to put the healthcare needs of others they care for before their own needs. In addition, women feel guilty taking time from work to go to the doctor for themselves. Instead, they save their time off (if they even get paid time off) to take care of others.

MENTAL HEALTH

HEALTH NEED: The need for mental health treatment and intervention continues to increase. High diagnosis rates for depression as well as an increase in suicide rates in adults substantiate this issue.

Progress since last CHA

- 64% of community leaders reported the issue of **mental health** was worse than it was three years ago, 15% reported the issue was better.
- 47% of community leaders felt there has been moderate or major progress in **increasing access and delivery of suicide care**, 14% said there was minor progress. 8% said there was no progress in this area.
- 43% of community leaders felt there has been moderate or major progress in **decreasing youth and adult suicide rates**, 17% said there was minor progress. 10% said there was no progress in this area.
- 31% of community leaders felt there has been moderate or major progress in **increasing the ability to assist individuals in a behavioral health crisis**, 39% said there was minor progress. 10% said there was no progress in this area.
- 22% of community leaders felt there has been moderate or major progress in **decreasing the wait time for initial behavioral health assessment and services**, 29% said there was minor progress. 18% said there was no progress in this area.
- 10% of community leaders felt there has been moderate or major progress in **increasing the number of mental health workers**, 29% said there was minor progress. 34% said there was no progress in this area.
- The chart on the next page summarize data gathered in 2022 from the Community Leader Survey and indicate community leader's perceived progress on key measures on this priority area over the last three years.

Community Leader: Perceived Progress on Key Measures

Mental Health

Continuing Support for Mental Health as a Focus Area

- The most common most important health related need or issue in Stark County named by community leaders were mental and behavioral health issues, mentioned by 41%. More specifically, the following were mentioned: availability of providers, need for more inpatient beds, staffing shortages, timely care, integration with primary care, depression, and suicide.
- On a 10-point scale in which 1 was 'Not at all important' and 10 was 'Very important', mental health was given an average importance rating of 9.56 by community health leaders, the highest average importance of the five health related issues from the last CHA cycle.
- 76% of community leaders reported there are not enough services and programs available in Stark County to address mental health issues. When asked what was missing to address this issue, the following were mentioned most often: workforce and staffing shortage, more providers and locations, timely/accessible care, community education and information for stigma reduction, specific kinds of care or treatment approaches, culturally competent providers and care, not knowing where to go for help, affordability of care, and integration of mental health into other medical offices such as primary care.
- 86% of community leaders felt it was very important for the CHNA Advisory Committee to address people with mental illness.
- A third of community leaders, (33%), agreed that *"Residents in Stark County are able to access a mental health care provider when needed."*
- County residents were asked to rate the seriousness of suicide in Stark County. Nearly a third (31.0%) said it was a very serious problem while nearly half (45.4%) said it was moderately serious (Source: *Stark Poll 2021*).
- About a third, (33.8%), of county residents reported a negative change in day-to-day mood, mentality, or general outlook in the past year while, 24.5% reported new feelings of isolation, disconnection, or loneliness.
- The number of adults and children receiving behavioral health assistance increased steadily over the past five years (9% increase for adults and 7% increase for children) (Source: *Stark MHAR 2022*).
- More than a third of students, (34.5%), reported they have been told by a health care professional they had a mental health issue before the current school year. The most common mental health issues for female students were Anxiety and Depression. For male students, the most common issues were ADD/ADHD and anxiety (Source: *Northeast Ohio Youth Health Survey 2021*).

OBESITY AND HEALTHY LIFESTYLE CHOICES

HEALTH NEED: A large portion of county residents are overweight, not exercising regularly, and not making food choices based on nutritional information.

Progress since last CHA

- 41% of community leaders reported the issue of *obesity and healthy lifestyle choices* was worse than it was three years ago, 8% reported the issue was better.
- 23% of community leaders felt there has been moderate or major progress in *increasing the number of residents consuming fruits and vegetables*, 35% said there was minor progress. 11% said there was no progress in this area.
- 15% of community leaders felt there has been moderate or major progress in *increasing the percentage of residents who report their health as excellent or good*, 26% said there was minor progress. 9% said there was no progress in this area.
- 11% of community leaders felt there has been moderate or major progress in *increasing the number of residents participating in physical activity*, 32% said there was minor progress. 15% said there was no progress in this area.
- The following chart summarize data gathered in 2022 from the Community Leader Survey and indicate community leader's perceived progress on key measures on this priority area over the last three years.

Community Leader: Perceived Progress on Key Measures *Obesity and Healthy Lifestyles*

Continuing Support for Obesity and Healthy Lifestyle Choices as a Focus Area

- On a 10-point scale in which 1 was 'Not at all important' and 10 was 'Very important', obesity and healthy lifestyle choices was given an average importance rating of 8.42 by community health leaders, the fifth highest average importance of the five health related issues from the last CHA cycle.
- 56% of community leaders reported there are not enough services and programs available in Stark County to address obesity and healthy lifestyle choice issues. When asked what was missing to address this issue, the following were mentioned most often: community education and buy-in, access to healthy food, access and affordability, and more resources, programs and supports.
- 46% of community leaders felt it was very important for the CHNA Advisory Committee to address people who are overweight or obese.

- 
- Community leaders were also asked what challenges they feel people in the community face when trying to maintain a healthy lifestyle. The most common responses mentioned were having access to healthy food, (44%); affordability, (38%); safe outdoor green space, (28%); health literacy, (20%) (information overload); time, (14%) (busy schedules); transportation, (11%); social determinants, (11%), and motivation, (11%).
 - More than a quarter of adults in Stark County, (28%), are considered physically inactive, a number that has been slightly increasing over the last several years (Source: *County Health Ranking 2022*).

Website	www.starkfresh.org
Description	<p>StarkFresh is tackling the causes of hunger by creating realistic pathways out of poverty. All programming is designed to reduce or remove a barrier for someone to be able to take a step towards that goal. Programming includes;</p> <ul style="list-style-type: none"> • Mobile Grocery Market • Neighborhood Grocery Store • Food Incubation Center • Urban Training Farm • Seed Library • Cookware Recovery
Name	<i>Stark County Hunger Task Force</i>
Website	http://starkhunger.org/
Description	The Stark County Hunger Task Force fights hunger within the community by providing financial, logistic, strategic, and food support to our network of local emergency food pantries. The Hunger Task Force strives to provide free, nutritious groceries to those in need through the agencies Pantry Support and Backpack for Kids Programs.
Name	<i>Stark County Park District</i>
Website	www.starkparks.com
Description	Stark Parks works toward an environment in which people feel safe and connected by providing the community with the best parks, trails, and resources available. The agency manages 15 parks, 4 lakes, and over 120 miles of hiking, biking, and equestrian trails, totaling over 8,000 acres of land. Stark Parks offers a variety of programming and events that includes some of the following: boating, canoeing, camping, fishing, healthy adventures, and a wildlife conservation center.
Name	<i>Stark Marketeers</i>
Website	https://stark-marketeers-starkcohealthoh.hub.arcgis.com/
Description	Stark Marketeers' aim is to encourage residents to visit our local farmers markets, track their visits and purchases, improve eating habits, find walking trails near them, and support other local food resources. Fresh and locally grown or made goods is what you will find at our area's farmer's markets. Visiting Stark County's farmers markets is an excellent way to support our community and explore a part of Stark County that you may not have been to before.

Community Health Assessment:

Detailed Results

The five data components in this assessment include:

- **Stark Poll** - The 2021 Stark County Collaborative Poll was a large-scale, random sampling survey of households in Stark County. The final sample of the poll consisted of a total of 600 respondents.
- **Community Health Leader Survey** - A web survey of 125 community leaders with knowledge of the health needs in the community.
- **Secondary Data Analysis** - Main sources of data include the American Fact Finder, Ohio Department of Health, and County Health Rankings. Youth data is from the 2021 Northeast Ohio Youth Health Survey.
- **Maternal Health Community Focus Group** - Facilitated discussion with a demographic mix of Stark County women of childbearing age. The five participants were all women ages 18 to 44 who live in Stark County. The group consisted of participants of different races and backgrounds, with and without children, and living in urban, suburban, and rural areas.
- **Voices of Stark County Report** - Consisted of data from six community meetings and 15 small focus groups. A total of 167 individuals participated. Voices of Stark County Report was compiled by the Behavioral Health Access and Integration Collaborative.

More detailed information about the data components can be found in Research Methodology appendix.

THE RESULTS ARE BROKEN DOWN INTO THE FOLLOWING TOPIC AREAS:

- Community Needs
- Social Determinants
- Personal Health Status
- Access to Health Care
- Mental Health
- Oral Health
- Smoking/Tobacco Use
- Alcohol and Substance Abuse
- Maternal, Infant, and Child Health
- Healthy Living
- Communicable Diseases, Vaccinations and Prevention Services
- Chronic Disease Management
- Transportation
- Housing
- Environmental Quality
- Safety, Injury and Violence
- Reproductive and Sexual Health

COMMUNITY NEEDS

COMMUNITY LEADER SURVEY

The 125 community leaders who completed the on-line survey were first asked what they thought were the most important health related issues or need in Stark County right now. Community leaders were then asked a follow-up question as to what needs to be done to address the issue(s) they mentioned. Both questions were open-ended.

The most common need or issue named were mental and behavioral health issues, mentioned by 41% of community leaders. More specifically, the following were mentioned: availability of providers, need for more inpatient beds, staffing shortages, timely care, integration with primary care, depression, and suicide. Increased workforce and addressing social determinants of health were common themes of what needs done. Nearly a third of community leaders, (32%), mentioned social determinants of health as an important health related issue or challenge. This included things such as transportation, affordable and available housing, access to food, childcare and violence. Connecting residents with available resources, removing barriers, and education programs were common themes of what needs done. Nearly a quarter of community leaders, 23% named addiction and overdoses. This included things such as the opiate epidemic, increase in overdoses, and the need for more addiction services and locations for sober living.

Other issues named by community leaders include, in order of importance, obesity and healthy lifestyle choices (children not getting enough exercise, nutrition), access to healthcare (not enough providers, caring for most vulnerable populations), health equity (cultural competencies, disparities in healthcare, need for more Spanish speaking providers, trans-affirming care), COVID-19 (educating public and vaccines), and infant mortality and maternal health (postpartum support for all incomes, prenatal care, safe sleep education).

• • •
“There are not enough care providers. It is terrible that individuals have to wait months to see a psychiatrist/ Mental Health expert. The lack of funding for other services makes it impossible for providers to provide needed services.”

• • •
 Respondent on things that prevent residents from receiving needed health care

Most Important Health Related Issue or Challenge		
	# of Responses	% of Leaders
Mental/Behavioral health	49	40.5%
Social determinants of health- <i>Transportation, Housing, Food Access, Violence</i>	39	32.2%
Addiction/Overdoses	28	23.1%
Obesity/Healthy Lifestyle Choices	22	18.2%
Access to healthcare	22	18.2%
Health equity	19	15.7%
COVID-19	16	13.2%
Infant mortality and maternal health	12	9.9%
Poverty	9	7.4%
Dental care	6	5.0%
Chronic illness	6	5.0%
Sex education/Health	5	4.1%
Lack of knowledge of resources	2	1.7%
Communicable diseases	2	1.7%
Other	2	1.7%
Total	239	(n=121)

Question: Given your professional experience, what do you think are the most important health related issues or needs in Stark County right now?

When asked what needs to be done to address these issues, general themes included, in order of importance: healthcare centers throughout the county, collaboration, outreach and education, increased funding, and addressing basic needs. More specific recommendations are outlined in the table below.

What needs done to address issues	
<i>PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.</i>	
Issue	What Needs Done
Mental/Behavioral Health	<ul style="list-style-type: none"> • Increase workforce insurance reimbursement. • Need more providers to be able to meet the needs. • More psychiatrists so that meds can be started in a more-timely manner. More counselors. • Increase capacity of behavioral health providers by recruiting and developing the expertise to serve those with mental health needs. • If we don't have therapists that speak Spanish, we need to have people that are going to be prepared as a translator to serve in this that are not a medical translator. • More programs on awareness, specifically emotion regulation. More mental health support professionals available to youth activities, including sports. • Provide mental health services at schools, social media information, primary care access. • More treatment facilities. • Address employment and food insecurities. Reinforce the family unit. • Culturally diverse mental health practitioners, increased living wages, community allies and peer supporters, strength-based vocational training, purposeful work mentors. • Remove barriers for the clients. • Increase providers in the area. Network resources. • Recruit more mental health worker especially mental health workers for black, brown and LGBTQ+. • Raise awareness about the prevalence, treatment, cost and access issues, as well as embedding it into primary care and workplace. • Additional funding for mental health services. • Resources and funding for service agencies to be able to refer clients to these programs. • Coordinated approach to treating mental health- remove the silos so that acute providers work with chronic providers and figure out how to add a navigator or coach into the team. Access to community based mental health care is adequate, but care is highly UNCOORDINATED. • Resources and funding for service agencies to be able to refer clients to these programs. • There needs to be strategic goals of various organizations working within these fields. • Increased access. • Social determinants of health focused approaches, as well as policy and integrated governmental planning (cross department/organization).

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

Issue	What Needs Done
Mental/Behavioral Health	<ul style="list-style-type: none"> • Increased access to providers and resources, addressing structural racism and social determinants of health. • More robust funding system as well as workforce. • Coordinated county initiatives to share resources (knowledge, experience, funding) to understand and address the issues. • Look to the local FQHCs and FQHC Look-Alikes to have programs to target these needs. Equity in the Health Center program and advocacy from community partners for equitable funding for look-alikes. • Not sending SMI to prisons. • Identify providers, information sharing. • Public awareness campaigns focusing on the maintenance of mental health. • Open free mental health services or set up at local libraries. Ensure our schools have the proper resources to assist in providing information to families. • Continue to fund, create, and promote programs to help combat these issues. • Continued education and awareness initiatives; more money and services in schools from community-based provider agencies--even for those kids that aren't Medicaid eligible. • More psychiatric beds in community as well as hospital training/expertise. • Ambulance reimbursement rates for transport. • Additional mental health services must be available and easily accessible. • Start with adults so they can save themselves and help their children. • Mental health counseling is currently a shortage of providers. • Listening to the needs and suggestions of AA stakeholder. Recruitment and training of more health care providers, flexible scheduling of service providers. • Utilize Nurse Practitioners with Mental Health expertise in communities with referral processes to better address needs.
Social Determinants	<ul style="list-style-type: none"> • More affordable housing options and childcare. • Housing programs that are easily accessible and affordable. • Social Determinants are extreme for many patients, agencies that help are siloed well intentioned, but there is no central coordination. Providers do not always know how to access support/resources. • Housing programs that are easily accessible and affordable. • Universal Basic Income. • Safe spaces to exercise that are affordable. • Our community needs to continue to look deeper into the poverty in Stark County and devise a plan to help our families. • Targeted assistance to low-income families, such as job training and childcare access, to help break the cycle of generational poverty. • Training/upskilling. • Tax the rich so we have the resources to serve those in need. • The county needs to redirect resources, including Health Department resources, to fund more mental health care providers, to create a tenant union, and to help

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

Issue	What Needs Done
Social Determinants	<p>provide people with appropriate clothing and other hygiene items necessary to make job interviews successful.</p> <ul style="list-style-type: none"> ● Funding, education, access to transportation and technology, employment. ● Addressing social determinants of health and root causes to poor health, funding for long-term programming and systemic change (vs 'band aid' fixes) and recognizing that those with daily challenges cannot focus on health as a priority. ● Transportation can be addressed in that we need sources that do not require three days of prior notice to get set up. Medicaid plans, and many other insurance plans, will pay for transportation but usually require at least 3 days prior notice to schedule. SARTA is similar. These are all good options but not all patients can be this organized, or things happen that transportation all of a sudden becomes an issue. It would be great to have some type of voucher system, or a card, that the patient could use with a variety of transportation providers that are part of a 'network'. Something like calling for a taxi, but it could be coming from a network of resources but could be there within an hour or so. ● Coordination with service providers and transportation centers, faith based and non-profits. ● Local government can propose to allocate more funds for projects that will consistently support rental assistance, affordable home ownership, and home repair programs. Monitoring of property owners/ out of town landlords that purchase property in lower income communities and tracking median incomes, and capping what can be charged. ● Educate residence enforce code on landlords. ● Strict rules for landlords to maintain safety. Education for tenants. ● Funding from Municipalities needs to be supplied for programs to provide meals to individuals in need. ● Educational programs. ● Community awareness and collaborative work across professions, neighborhoods, religions, etc. ● More diabetes education, more access to fresh foods/transportation to fresh food. ● Collaboration, better use of resources, and bringing the most vulnerable to the decision-making table(s). ● Continue to address food deserts, improve access to fresh fruit, produce and foods not highly processed. ● Continued education/outreach. ● Look at our food desert and put in an actual grocery store. ● Use some of the empty building and create low-income apartments/with employment training as a stipulation. ● Look at working class, insurance and medical expenses need to be lowered. ● Assess areas of need, plan program implementation. ● Collaboration, Community Member empowerment, Funding for Youth Programs, Mentoring and Coaching.

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

Issue	What Needs Done
Social Determinants	<ul style="list-style-type: none"> • Money. • Community outreach and education, free clinics in neighborhoods, address pharmaceutical costs. • Better focus on teaching people how to get an education, better employment, etc. and break the cycle.
Addictions/Overdoses	<ul style="list-style-type: none"> • More treatment facilities. • Address employment and food insecurities. Reinforce the family unit. • Resources and funding for service agencies to be able to refer clients to these programs. • Continue to make naloxone more readily available within the communities (naloxbox) and needle exchange programs. Publicize places of assistance that help people apply for insurance/Medicaid and establish stations within the community allowing easy access to apply. • Improving comprehensive, community-wide, collaborative strategies to address substance use issues across the lifespan. • Education with follow up on enforcement. • Education programs in schools (public and non-public), community centers, and on social media. • Information on where to seek treatment. • Increased awareness and opportunities for training, especially in the law enforcement community. • Continue to fund, create, and promote programs to help combat these issues. • More education, information, and making services more accessible to our community. • More coordinated effort, more sharing of information and data among multi sectors, more educational classes. • Greater connections made to the communities in need – engagement. • Continued sharing of information. • Further address at the resident/community level by engaging with those trusted to communicate the resources available. • Community Prevention activities.
Obesity/Healthy Lifestyle Choices	<ul style="list-style-type: none"> • Obesity - better education regarding health, nutrition and healthy lifestyles from childhood on for children, and improved healthy food choices in schools. • Community Gardens. There are studies that show the physical, mental, and spiritual benefits to simply being outdoors. Find ways to reach our youth and adults with outdoor activities. • In the county rankings, our access to facilities and obesity rate is worse than the country as a whole. Maybe there's a case for greater collaboration between YMCA's and local park and rec departments. • Stress importance of this to our clients. • More promotion of outside programs/activities, cooking/diet classes.

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

Issue	What Needs Done
Obesity/Healthy Lifestyle Choices	<ul style="list-style-type: none"> ● To address obesity, we need to offer healthy meals to all students regardless of income. ● Education and resources. ● Community Awareness. ● Health curriculum designed and implemented by the State would be a start. ACCESS TO FRESH FRUITS AND VEGETABLES /IN SCHOOL AND IN THE COMMUNITY. ● Obesity - start in preschool and elementary by educating and PROVIDING healthy snacks and fun activities. ● Community collaboration throughout the ENTIRE county, not just the greater Canton city region. Programming and attention is lacking in the more rural regions including Alliance. ● Greater organizational collaboration data gathering AND sharing mapping investment of time and resources at neighborhood level. ● Community feedback collected on what would increase mobility/exercise for all age groups and in different areas of the County; cooking classes/life skill classes in school curriculums; continued advertising through various outlets of food programs (especially in summer/non-school days).
Access to Health Care	<ul style="list-style-type: none"> ● Remove barriers for the clients. ● SE end of Canton is in desperate need of healthcare, food and safer neighborhood. A few times initiatives were planned but never came to fruition. Currently there is a new initiative with Crossroads church, Stark Fresh and My Community Health Center we and our community need to band together and totally support and expand this noble and critical effort. ● Increase access. ● People need better resources on the importance of primary care. Then more options of seeking that care whether it be bringing it to them (mobile) or helping them find ways to get there. ● Increased emphasis on recruitment of providers and support to organizations seeking qualified candidates. Additionally, support in retention and access to training to help support provider education. ● Positively impact the social determinants of health that prevent individuals from seeking health care. ● Provide cost effective health care. ● Reduced rates or free services & medications. ● Additional educational resources and programs reimbursement rates to allow for competition with other front-end employers for home care aides. ● More state and federal funding for Medicaid clinics. ● A convergence of strategies to bring together Health care and healthy food options to various parts of the community. ● Recognize the importance of these issues and commit resources to improve the delivery of these services support policies to provide reimbursement for services

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

Issue	What Needs Done
Access to Health Care	<p>related to these issues</p> <ul style="list-style-type: none"> Utilize Nurse Practitioners in areas with reduced access to PCP.
Health Equity	<ul style="list-style-type: none"> Increased training and recruitment of black service providers, increasing black/POC leadership in local hospitals. Training for healthcare professionals in caring for trans folks. Developing ways to bridge existing gaps to reduce inequity. Educational supports information provided in various languages. Instruction, supervision, materials and CLC application updates. Do a better job of being visible in the communities you serve. More outreach and education. Every health care provider needs to have a language access plan and they need to build up awareness of accepting clients who do not have health care or the option to have health care due to not having a social security number. Effective education and engagement of all community sectors for recognition of the interrelated nature of the social determinants and development of a community wide strategy that fully engages all sectors of the community in a meaningful manner. Improve transportation services to get to medical offices. Increase community awareness of our FQHC's. Provide accessible in-patient addiction treatment centers geographically located for all Stark County residents. Continue to work to reduce poverty. Ensure safe, affordable housing. Local governments need to continue to address business development for food insecurity areas to offer healthy foods. Continue to develop walking and bike paths throughout the county.
COVID-19	<ul style="list-style-type: none"> Collaborative COVID messaging. Increase vaccination rates. Continue to education the community. Incentives to be vaccinated. Even though people are burned out on COVID, stay the course. Many of us continue to 'fight the fight' with education messages and vaccine accessibility. Ongoing active combating of misinformation about COVID. Collaboration with the public/private care system to reach seniors; outreach; including their reps in community efforts to increase awareness. Raising awareness. Increasing awareness/providing resources.
Infant Mortality and Maternal Health	<ul style="list-style-type: none"> Continue to promote safe sleep and prenatal care (drive thru baby showers are great, especially related to COVID, but including educational topics would be beneficial). Include condoms and STI prevention at baby showers. More access to low-income people. Address the needs of women across all demographics, but especially those who, for whatever reason have a difficult time getting their need met. Neighborhood health care centers. Continued healthcare education and removal of barriers for people of poverty.

What needs done to address issues

PLEASE NOTE: recommendations are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below.

<i>Issue</i>	What Needs Done
Dental Care	<ul style="list-style-type: none"> • Create emergent scheduling for patients with dental care. • Portal clinics that screen and provide basic services. • Provide more accessibility to dental services. • The first two are a matter of supply to equal demand. Dental is very capital intensive.
Communicable Diseases	<ul style="list-style-type: none"> • Wellness campaign to prevent the spread of any communicable disease.
Lack of Knowledge of Resources	<ul style="list-style-type: none"> • There needs to be a mechanism in place to help the community understand which services are being accessed outside of the county. In other words, it is one thing for organizations serving Stark to report on programs/services and demand/need, but what about the potential 'missing' data that may not capture individuals seeking support outside of the county due to the expansion of technology capabilities (i.e., mental health services). • Mailers to lower income community members, gorilla marketing, bring back the stand down, veterans' healthcare information being shared, community events, better coordination, drive thru resource fair, engage low-income employers, engage the cities to include information in bills/mailers, create a newsletter dropped to low-income zip codes, and so much more.
Chronic Illness	<ul style="list-style-type: none"> • Funding for community health workers at the state and federal level to provide local programming.
Sex Education/Health	<ul style="list-style-type: none"> • Improved well child visits, improved immunization rates, STI prevention, birth control access, non-traditional hours clinics. • Education in the schools and at pediatrician offices; more access to care.

Community leaders were given a list of the five health-related issues that were identified as priorities through the last Community Health Assessment cycle and asked, based on their professional experience, how important they thought the issue CURRENTLY was on a scale of 1=Not at all Important to 10= Very Important. Responses were averaged in order to rank the importance of the issues. It should be noted that all issues had an average importance of 8.0 or higher. The top three issues, based on the rankings, were (1) mental health services, (2) addiction, and (3) access to health care.

Importance of Issues

Community leaders were once again given the list of the five health-related issues that were identified as priorities through the last Community Health Assessment cycle and asked how the need has changed over the past three-year period. Infant mortality and maternal health and access to health care had the largest percentage of respondents who felt that these issues are much or somewhat better than three years ago (41% for access to care and 58% for infant mortality). Significantly more than half of community leaders felt that mental health and addiction have gotten somewhat or much worse over the past three years.

Change in Need from 3 Years Ago

Community leaders were also asked if they thought there were adequate services and programs already in place to address each issue. The issue that the majority of community leaders thought already had adequate resources in place was for infant mortality and maternal health. A significantly smaller percentage felt that there were services and programs for addiction (37%) and mental health (24%). If they indicated there were not enough services or programs in place, they were then asked what is missing. Responses to this question are listed, verbatim, on the table on the next page.

Adequate Services and Programs Available to Address Issue

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Access to Health Care	Transportation and other social determinants (mentioned by 11 respondents)
	<ul style="list-style-type: none"> Childcare.
	More providers/locations (mentioned by 12 respondents)
	<ul style="list-style-type: none"> Should be some type of clinic in 'every' quadrant. Mobile, pop ups. Meet clients where they are at. Services for residents not living in high-population areas. Location of primary care in certain neighborhoods. New primary care and urgent care. Having it in underserved areas. Providers who take insurance. Acceptable number of providers and organizations accepting patients, new patients, uninsured patients, Medicaid patients. Psychiatrist and other specialty physicians. More options for good health care for people on Medicaid.
Access to Health Care	Culturally competent providers/care (mentioned by 10 respondents)
	<ul style="list-style-type: none"> Removing bias in healthcare that no one wants to admit - clinicians that really want to help those they serve. Providers for people. Increase diversity of providers - is there less avoidance if the provider looks like me? LGBTQ competency in healthcare practitioners, trans affirming care, creating ease of access to healthcare for marginalized populations. Information and access for community members who do not have social security numbers. Increase the number of available providers who look like the persons they are serving especially in the African American and Latinx community. Increase the training in the areas of equity and cultural humility of the current providers and staff. Equity.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Access to Health Care	<ul style="list-style-type: none"> Equity and education in communities of color. Hospital cultural linguistic skills and capacities.
	Lack of information/ Need education about available options and support services (mentioned by 5 respondents)
	<ul style="list-style-type: none"> Knowledge on how to sign up and use benefits. Maybe an increased collaboration and marketing campaign to enhance community resident understanding of where and how to access care.
	Sites that offer comprehensive services, wrap around services (i.e. 'one stop shop') (mentioned by 5 respondents)
	<ul style="list-style-type: none"> Coordination of care. Centralized scheduling. Follow-up services.
	Assistance with insurance and signing up for services (mentioned by 4 respondents)
	<ul style="list-style-type: none"> Places that offer assistance applying for insurance by meeting the client where they're at. Are we offering to assist folks to apply for health insurance when they go to a community clinic? Are we providing them clear, basic info in how insurance may benefit them? Lack of insurance coverage or ability to pay . Health insurance rates are not high enough, high deductible plans make care inaccessible and for those who are insured, many are unaware that preventive services have no associated costs (for the most part). Easier process for getting signed up-way too much red tape and hassle, not enough.
	Free health care, affordable health care (mentioned by 4 respondents)
	<ul style="list-style-type: none"> Affordability for working poor, seniors that don't qualify for government assistance.
	Staffing shortages/challenges (mentioned by 3 respondents)
	Availability to see a provider in a timely manner. (mentioned by 2 respondents)
	<ul style="list-style-type: none"> When establishing with a new provider scheduled appointments can take weeks to months to be seen.
	Hours/Availability/Flexibility (mentioned by 2 respondents)
	<ul style="list-style-type: none"> More/better hours. Improved 'sick leave' policies to allow people with jobs to access healthcare without getting docked, paid family leave upon birth/adoption/loss of infant to allow families to make it to important appointments, school-based health care centers that allow parents and students to get care close to home, offering extended or adjusted hours at clinics.
Other missing items	
<ul style="list-style-type: none"> The importance of primary care and making this care available to all. Policy change. A willingness to get care, people ignore symptoms out of fear, reluctance to identify problems. We certainly need to increase proactive preventive care. Innovative ideas. Chronic disease management. Too many specialists require referrals. 	

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

<i>Issues</i>	What is Missing
Access to Health Care	<ul style="list-style-type: none"> Better community collaboration and assistance outside of Canton and the greater Stark County region. Dental care is also very hard to access if you are uninsured, and that covers a huge part of the population.
Addiction	<p>More providers/locations/treatment centers/resources in community (mentioned by 22 respondents)</p> <ul style="list-style-type: none"> Easy access across various regions of the county. There are not enough resources. There are not enough facilities and support systems to support the issue that is growing particularly due to the trauma and stress of the pandemic. Sufficient resources. Acceptable number of providers and organizations accepting patients, new patients, uninsured patients, Medicaid patients. Programs that meet PWUS where they are at (e.g., low-threshold Tx, supervised injection sites). Need more inpatient services. More treatment beds/units. More options/programs for these individuals to access. And more resources for their families. Not enough resources. More options for good health care for people on Medicaid. More in home rehab programs, more beds for programs in general. Aftercare such as housing. Lacking rehab services and providers. Inpatient services. Inpatient treatment centers geographically located. A larger focus in smaller stark county cities, many residents remain in their own town and often don't seek resources outside of their cities. Treatment facility - more than just detox - in our local area. Both in-patient and out-patient programs and resources. Beds for acute care and then to maintain follow-up for more than a few weeks or months. <p>Education and Information/Stigma reduction (mentioned by 10 respondents)</p> <ul style="list-style-type: none"> Proper marketing. More community discussions: remove the stigma this crosses all economic levels/races. Mental health concerns. Public buy-in to addiction concerns. 'Marijuana isn't hurting me' mentality. More education and preventative programming. Education; innovative programs and public health strategies (needle exchanges, etc.). Education because addiction does not always just have to involve drugs. Help people to recognize signs of addiction (especially schools, parents, and caregivers) so they can help with early prevention and intervention. Continued education. There is still a lot of stigmas. It would be great to have a campaign featuring someone who has lived and dealt with someone with addiction through the difficulty and nightmare of it. Especially someone that maybe initially felt against naloxone because they felt it was enabling

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Addiction	<p>the person, now feels that it's a huge benefit because they were part of that person's recovery firsthand. Yes, there is still lots of stigma, but one of the things that I'm hearing and witnessing is the struggle with helping someone that doesn't seem to want or be able to help themselves and puts themselves and others through h***. There is this feeling of 'why should I help them when they don't seem to want to get better? They'll just do it again and again.' We need to show someone who has been through those feelings and had that viewpoint but has now come out the other side.</p> <ul style="list-style-type: none"> Addiction is still taboo. People still avoid talking about addiction and treat addicts as if they were sub-human. Lowering stigma in the community (education).
	<p>Workforce/Staff shortage (mentioned by 8 respondents)</p>
	<ul style="list-style-type: none"> Counselors to support the work. Workforce to meet the demand. Access to licensed therapists.
	<p>Culturally competent providers/care (mentioned by 5 respondents)</p>
	<ul style="list-style-type: none"> We need more people who represent communities of color. Service to help the Hispanic community that is more and more in this county. Equity. Qualified health professionals who have no bias. Yes, LGBTQ competencies in this area are incredibly lacking.
	<p>Knowing where to go for help (mentioned by 5 respondents)</p>
	<ul style="list-style-type: none"> Maybe if you can publish a list of treatment centers so we can guide our clients to them if they are interested in them. Knowledge of where to go for help, costs of treatment. Health Literacy? Maybe? I feel the resources are in the community but maybe the community is not aware of the resources or how to access. Also many people do not know where to direct and addict for help or support. This includes law enforcement. Awareness of services to address those who may be struggling with an addiction.
	<p>Collaboration (mentioned by 3 respondents)</p>
	<ul style="list-style-type: none"> Ways to connect the addicted to counseling and programs that will help them. Collaboration, feel like things are not cohesive with all the groups working on these issues. Connection between services. Funding barriers.
	<p>Long term assistance (mentioned by 2 respondents)</p>
	<ul style="list-style-type: none"> Holistic long-term treatment that allows the person to move forward in society (No daily trips to rehab to get medication).
	<p>Safe needle exchange, safe use and Narcan (mentioned by 2 respondents)</p>
	<ul style="list-style-type: none"> We need greater access to safe use and Narcan. Again, just availability and easy access to safety measures like naloxone and needle exchange programs. We have made some great strides and need to continue the momentum.
	<p>Effects of the pandemic (mentioned by 2 respondents)</p>

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Addiction	<ul style="list-style-type: none"> • Factors related to the pandemic—such as social isolation and stress, people using drugs alone, an overall increase in rates of drug use, and decreased access to substance use treatment, harm reduction services, and emergency services. • The issue is exploding since Pandemic. Project Dawn is successful, need more clinicians and programs. <p>Affordable healthcare/help (<i>mentioned by 2 respondents</i>)</p> <p>Other missing items</p> <ul style="list-style-type: none"> • We could also use other avenues of treatment. This could be run therapy, guitar therapy or anything else. • We do not have Crystal Meth Anonymous in Stark County. • Stark County is also lacking open AA meetings for women only. I work with women that have been in domestic situations and that trauma prevents them from attending a co-ed AA meeting. • Trauma informed recovery programs. • Specialized training in AOD. Society as a whole has floundered after the onset of the opioid pandemic...no real education as of late. More up to date information on marijuana and medical marijuana use. • SDoH screening. • Transportation to get to appointments. • Housing that provides support to residences. • Constant issue in our community. What then does the treatment landscape look like? Are we able to meet the demand? If not, why not. • Breakdown of barriers. • Allowance for relapse.
Infant Mortality and Maternal Health	<p>Education/Initiatives (<i>mentioned by 12 respondents</i>)</p> <ul style="list-style-type: none"> • Women, especially young women, need PRE prenatal education. Waiting till a woman is pregnant is sometimes too late for important information regarding her pregnancy. • Renewed safe sleep initiatives. • Breastfeeding initiatives by all providers. • Not enough prenatal education and support. • More information for all populations. • Information and access to prenatal care for community members who do not have social security numbers. • Personal development for parents. • Education and increased support. • Education about prevention. • Coordination and community awareness campaign for increased and strategic focus, particularly on the community level to reach impacted and underserved communities (e.g., African American / Hispanic populations). <p>More providers, locations, resources (<i>mentioned by 6 respondents</i>)</p> <ul style="list-style-type: none"> • Sufficient resources. • Need better coverage in SE Canton. • More options for good health care for people on Medicaid.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Infant Mortality and Maternal Health	<ul style="list-style-type: none"> Funding and resources to adequately serve the population. 1 clinician with a monthly caseload of 700 for their service area will burnout the clinician. This then makes it difficult to grow the caseload they are already struggling to maintain. Access to resources.
	Address social determinants of health (mentioned by 5 respondents)
	<ul style="list-style-type: none"> The need to address social determinants of health - adequate housing, transportation, food. Food, mental health services, diapers. Mental health services. Employment. Affordable quality childcare options.
	Culturally competent providers/care (mentioned by 4 respondents)
	<ul style="list-style-type: none"> True access to (BIPOC) mothers. BIPOC centered services. Culturally competent healthcare providers (pre, post maternal). Combating racial disparities in healthcare outcomes and educating healthcare professionals about the impact of their implicit bias on health outcomes.
	Workforce/Staff shortage (mentioned by 3 respondents)
	<ul style="list-style-type: none"> While the THRIVE program has made great strides, there are not enough community health workers to support the need. I am seeing a high turnover of employees that are CHW in this county. The mothers I am working with have a lack of consistency of care. There are mixed messages in parent education as well as lack of relationship building with parents and case worker. Equity in pay for CHWs.
Other missing items	
<ul style="list-style-type: none"> Access to early prenatal care. Self-care for mothers. Infant and maternal care isn't worse, it just hasn't seemed to change. Much of this is from a much larger systemic issue related to policy for maternal healthcare (postpartum care including mental health, parental leave, etc.). Current status of abortion laws in Ohio and Roe V. Wade will also likely have a significant impact of this for future years. Insurance/Benefits - Medicaid and private insurance payment for doulas, midwives Flexibility with benefits cliffs to sustain moms/dads who need to return to work. Collaboration, feel like things are not cohesive with all the groups working on these issues. 	
Mental Health	Workforce/Staff shortage (mentioned by 24 respondents)
	<ul style="list-style-type: none"> Workforce seems to be (one of) the biggest factors but is due in large to the impact of the pandemic. Efforts to retain the workforce seem to be helping to an extent, but the exodus from the public to the private sector seems insurmountable at times. Perhaps continued work to expand telehealth options and alternative work locations will help? There's a shortage of staff members who can provide services. There are not enough clinicians to support the need in our community. Staffing, same as health care.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Mental Health	<ul style="list-style-type: none"> • Staffing is a critical issue when attempting to access mental health providers. Turnover rate is high. • Staff to supply the services. • Staff retention to avoid frequent changing of providers for families. • Qualified providers within the existing agencies. Workforce is a major issue right now and there are not enough qualified providers for our organizations to hire. • Psychiatrists and other prescribers. Enough counselors. • Not enough MH therapists employed in Stark County to meet the needs of children and families. • Not enough counselors and resources. • Lack of providers, over-worked and overwhelmed case managers, which in turn make them truly ineffective at the jobs. • Lack of personnel. • Increased workforce for demand. • Enough case managers, therapists, and psychiatrists. • Counselors to support the work. Workforce to meet the demand. • Availability of professionals. • Lack of staff is an obstacle for agencies to be better serve clients. This is a national crisis, and we need to be able to sustain a higher pay for therapist.
	<p>More providers/locations/treatment centers/resources in community <i>(mentioned by 23 respondents)</i></p> <ul style="list-style-type: none"> • Easy access across various regions of the county. • Treatment centers. • There is a need for increase treatment providers. • There are not enough providers. • Sufficient resources. • Providers who accept Medicaid. • Medication prescribing provider relationships i.e., clinician vs physician med management standards. • Programs with positive outcomes. • Number of providers available. • More options for good health care for people on Medicaid. • Limited number of providers. • Lack of quality providers, and even fewer accepting new patients. • Lack of agencies providing service. • I just don't think there are enough options and availability in general for people. • could services be offered at homeless shelters? • Funding. • Enough providers to address needs of young people, especially before they leave the school setting and immediately after. • Clinics and providers.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Mental Health	<ul style="list-style-type: none"> Acceptable number of providers and organizations accepting patients, new patients, uninsured patients, public safety patients.
	<p>Timely care/Accessibility (mentioned by 16 respondents)</p> <ul style="list-style-type: none"> The ability to get those with mental health issues into the facilities for treatment. Reduced treatment delays. Takes forever to get and appointment and consistency of scheduled visits. Easy access for low income. Easy access. Easier access for those living without means for payment. Availability of services. Availability of providers. When establishing with a new provider scheduled appointments can take weeks to months to be seen. Access to services. Access to services and need for more providers. Access to services. Access to service. Wrap around services to provider service organizations. Access to licensed therapists. Access to care, resources. Access is a significant issue, especially due to workforce and increased demand as more individuals have identified mental health as a concern post covid. Limited inpatient psychiatric care. Healthcare systems also being involved in screening and connecting individuals to appropriate care. Access for children and teenagers is limited and families say they are waiting a long time to get an appointment. It would be helpful if more schools could offer mental health counseling on their campus so that students wouldn't have to leave school grounds and miss valuable educational time to seek treatment.
	<p>Education and Information/Stigma reduction (mentioned by 14 respondents)</p> <ul style="list-style-type: none"> We have all the science and studies, what we need is care for people in need. Understanding of how MH impacts individuals and therefore the community. Reducing the stigma of mental health and trust to seek out help. More education to general public. More awareness of issue, more openness/discussion of issue. More community support. I know we have great information on Mental health, but I think we need more training in helping someone who needs it, and we can guide them to the proper places to receive it. I think we're starting to make some changes in the area of stigma but have a way to go. Education, access to resources. Clarity on what the goal is in addressing mental health. Is it proactive in nature (services)? Is it on an as needed basis? Is it emergency based? Needs better defined. Very broad interpretations. Once defined can better answer what may be 'missing' in our community. More awareness of issue, more openness /discussion of issue. Community education and outreach.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Mental Health	<ul style="list-style-type: none"> • Education at an early age, there are people who contribute to the stigmas associated with mental health issues.
	<p>Specific kinds of care/treatment approaches (mentioned by 11 respondents)</p>
	<ul style="list-style-type: none"> • Tiered level of approach to care. • Singular guiding focus. • SDoH approach to why mental health is declined to begin with. • Intensive in-home based treatment options that work with the whole family need to be increased. • Non-medical support services. • Inpatient services. • In depth services for families. • Enhanced youth services re suicide and depression. • Inpatient care and are discharged too quickly because beds are needed. • Need more local inpatient services. • A more holistic approach and avenues to engage people that would not walk into a clinic. Simply put, engaging people to get them involved, but have a professional leading a conversation.
	<p>Culturally competent providers/care (mentioned by 7 respondents)</p>
	<ul style="list-style-type: none"> • We need more people who represent communities of color. • Trans-affirming providers are needed in MUCH great numbers. Trans affirming staff at all agencies. • Representation among therapist, counselors, and case managers. • More service to help the Hispanic community. • Mental help professionals in the black and brown community. • Limited number of providers of color (underrepresentation) Cultural competency of some providers. • Equity.
	<p>Knowing where to go for help (mentioned by 7 respondents)</p>
<ul style="list-style-type: none"> • Awareness of existing services. • The community at large is unaware of the process to begin care or what their coverage is if they have it. It should be built into primary care in primary school to normalize its use and importance. • Proper marketing. • Knowing the resources/service agencies that are available. • Awareness. I would not know where to go if I thought I was mentally needing help. • Awareness and suitable treatment plans. More research is required for mental health issues. • Knowledge of where to go for help. 	
<p>Funding/Insurance/Affordability (mentioned by 5 respondents)</p>	
<ul style="list-style-type: none"> • Third party payer funding for mental health services. • NOT ENOUGH AFFORDABLE OPTIONS. 	

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

<i>Issues</i>	What is Missing
Mental Health	<ul style="list-style-type: none"> • Lack of insurance coverage for these services ESPECIALLY for youth mental health care. Even as a foster parent there are not enough resources to provide for specialized, trauma informed counseling. • It is a combination of coverage of services (people need to get paid for what they provide) and availability of services. • Affordable healthcare. <p>Integration/Coordination/Collaboration <i>(mentioned by 5 respondents)</i></p> <ul style="list-style-type: none"> • Primary care integration. • Integration into medical offices so that in the spot care is available. • Perhaps a wholistic approach to integrating mental health care into school and workplace systems. • Care coordination - most persons who struggle with mental illness need help to successfully manage their illness which can have acute episodes at times. Patients go all over the state for acute. • Better community collaboration and assistance outside of Canton and the greater Stark County region. <p>Address social detriments of health <i>(mentioned by 3 respondents)</i></p> <ul style="list-style-type: none"> • Childcare while parents seek services, transportation. • Transportation to get to appointments. • Transportation. <p>Impact/Effects of COVID <i>(mentioned by 2 respondents)</i></p> <ul style="list-style-type: none"> • Understanding the effects of the COVID-19 outbreak on the mental health of various populations are as important as understanding its clinical features, transmission patterns, and management. • The issue is exploding since pandemic, need more clinicians and programs. <p>Long-term support <i>(mentioned by 2 respondents)</i></p> <ul style="list-style-type: none"> • Follow up of services. <p>Other missing items</p> <ul style="list-style-type: none"> • It seems that these people are not going to utilize any services already provided on their own. I'm not sure how you would reach out with all of the HEPA restrictions in place.
Obesity and Healthy Lifestyles Choices	<p>Education, Information, and Buy In <i>(mentioned by 14 respondents)</i></p> <ul style="list-style-type: none"> • Public buy-into services. Too many other critical issues for families. • Obesity is a fatphobic and outdated term that is wildly inappropriate. As a HAES-oriented professional and fat person, the question is offensive, outdated, and this framing of healthy is barrier to fat people receiving care or seeking it at all. Get up to date on body neutrality, health at every size, and size bias within healthcare. • More information and help are needed to provide natural ways to manage your health. We are too quick to resolve issues with prescriptions. • More education and benefits of keeping a normal weight. This is another topic not talked about more. • More educational options from PCP. • Lack of resources or education.

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Obesity and Healthy Lifestyles Choices	<ul style="list-style-type: none"> • Lack of interest. • I feel we are an instant society. We also like a deal, and we are all busy. It is easy to grab the high fat, high salt and unhealthy processed foods and fast foods. Once again education/prevention tied to incentive in the workplace or a vanishing deductible for our high deductible insurance, or funds banked based on wellness and fitness associated with obesity and healthy choices. • Education to the public. • Education on healthy nutrition and lifestyle. • Education on available services and options in the community. Many places and insurers have programs to address obesity and other comorbid conditions (i.e. diabetes at the Y) but I feel like many community members are unaware of these types of free programs. Youth vaping is an issue. • Education for low to moderate income families on healthy habits and lifestyles. Organic and fresh foods such as fruits and veggies are much less affordable than frozen or processed foods. • Curriculum. • Consistent and sustainable education modules in K-12. • More educational programs to teach the basis on all things, finances, budgeting, conserving money, growing, and cooking own food.
	<p>Food access/Nutrition (mentioned by 14 respondents)</p> <ul style="list-style-type: none"> • Until families have access to healthy fruits and vegetables and healthy food at a reasonable price continue to be a challenge. • Maybe cooking classes for low income how to utilize SNAP more efficiently. • Tough for underserved to have access to healthy food, exercise, and support of change of lifestyle and thinking. • The work around food insecurity has been great. I think more opportunities to integrate a healthy lifestyle within everyday activities and routines would be beneficial. • Nutritional programs to help combat obesity and diabetes. • Need access to better food in low-income neighborhoods. • Improve food insecurity and offer healthy foods. Continue to improve access to hiking and bike trails. • Historical background on food choices, education on statistics and representation. Along with access and affordability to healthy foods and spaces to practice. • Affordable healthy food in easy to access areas and safe, affordable places to exercise. • Access to healthy food and education. • Access to healthier food options for many people in 'food deserts'. • Absolutely NO vegetarian options anywhere in any social setting, restaurants etc.; promotion of breweries & liquor continually; emphasis only of sports for men and not lifestyle exercise. • Absence of stores with fresh fruits and vegetables in many areas of the city/food deserts; blight/housing rather than recreational areas/ parks with activities; supervised. • Transportation to get fresh foods.
	<p>Access and Affordability (mentioned by 8 respondents)</p>

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Obesity and Healthy Lifestyles Choices	<ul style="list-style-type: none"> • More opportunities for the underserved population to do exercise and to teach the community about Health choice. • Improved access and utilization of registered dietitians (RD), references by primary care to RDs, primary care not listening to patients when it comes to their weight and diet and just assuming it is their weight that is contributing to their health without looking for root causes. • Gym memberships are too costly. • Are there affordable options to support those struggling with obesity and wanting to consider healthier lifestyle choices? • Affordable stores that offer healthy food and programs that teach the community about healthy choice and lifestyles. • Accessible spaces for exercise (trails, walking paths, etc.). • Access to healthy options. Prices of healthy options being way too high. • Access to gyms, YMCA programs. Cost is not affordable for the people who need it the most.
	More programs, resources, supports (mentioned by 5 respondents)
	<ul style="list-style-type: none"> • Tools to address these concerns. • Sufficient resources. • Programs, services, and affordable activities/programs for families. • Programming. • Community/neighborhood-based activities and education programming.
	Specific programs/approaches (mentioned by 3 respondents)
	<ul style="list-style-type: none"> • We need Blue Zones approach to changing our community! • Program for young adults and men's health care. • Focus on youth.
	Knowing what is available (mentioned by 2 respondents)
	<ul style="list-style-type: none"> • We need to advertise the programs that are available at the YMCA. Specifically, those available to the elderly and low-income populations. • Awareness.
	Culturally competent (mentioned by 2 respondents)
	<ul style="list-style-type: none"> • We need more people who represent communities of color. • Equity.
	Safety (mentioned by 2 respondents)
	<ul style="list-style-type: none"> • Safe places to exercise, education, access to care. • Safe exercise space. Healthy foods that are accessible and affordable.
	Collaboration and Coordination (mentioned by 2 respondents)
	<ul style="list-style-type: none"> • More collaboration among organizations, more funding support for these organizations, more data reporting. • Better community collaboration and assistance outside of Canton and the greater Stark County region.
	Other missing items

What is missing from Stark County to address issue

PLEASE NOTE: responses are verbatim/word-for word; only minor grammatical changes were made to the responses given by community leaders below

Issues	What is Missing
Obesity and Healthy Lifestyles Choices	<ul style="list-style-type: none"> • Very broad area. Could use further definition. Would then be able to answer more aptly what is missing. Generally speaking, seems there is much room for focused discussion and opportunity. • Most of my clients lack a schedule of any kind. The funnel effect of this is they are always playing catch up and feel overwhelmed all of the time. Self-care goes out the window and the focus is to have their issues fixed instead of going back and working on their everyday functions. • More options for good health care for people on Medicaid. • Businesses and programs ran by the target community; better environments (more gardens, more reasonably healthy restaurants and stores).

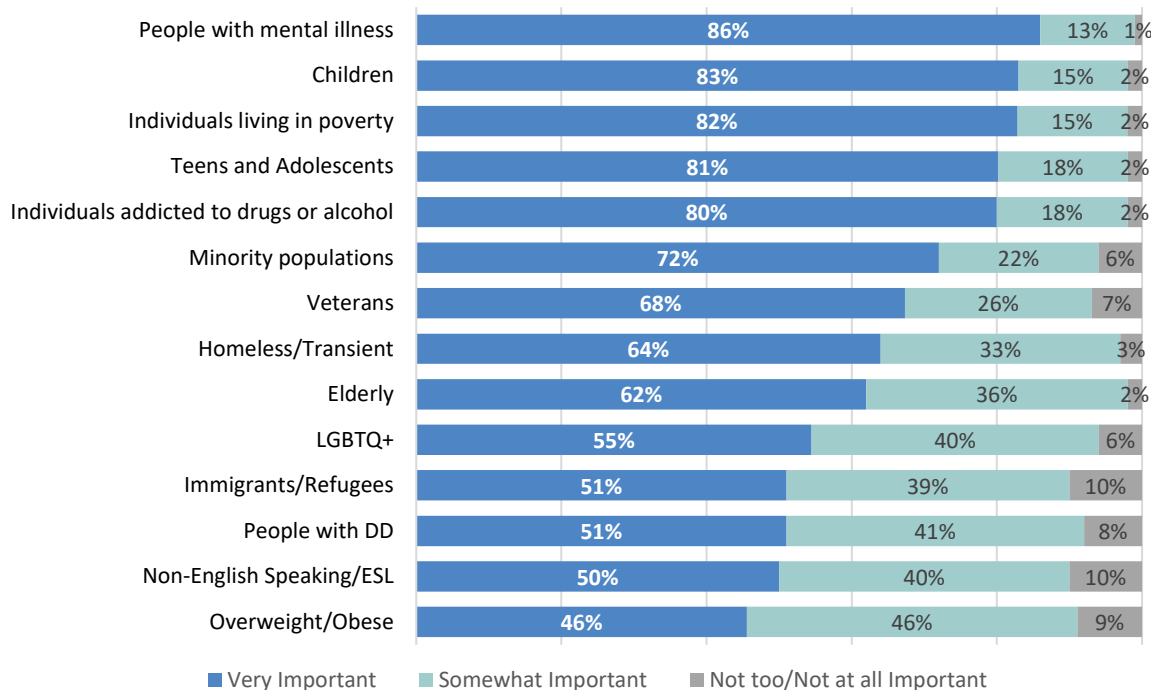

Over a third, (39%), of community leaders reported that there were additional important health issues that they would like to see the Stark County Community Health Needs Assessment (CHNA) Advisory Committee focus on over the next three years. The most common responses were social determinants, prevention, and health equity.

Other health issues like committee to address		
	# Responses	% of Leaders
Social determinants	10	8.0%
Prevention	7	5.6%
Equity/LGBTQ+ community	5	4.0%
Nutrition	4	3.2%
Covid	4	3.2%
Miscellaneous	4	3.2%
Chronic health	3	2.4%
Smoking/Vaping/Alcohol addiction	2	1.6%

Violence	2	1.6%
Total	45	(n=125)
<i>Question: Are there any other important health issues that you would like to see the Stark County Community Health Needs Assessment (CHNA) Advisory Committee focus on over the next three years? What would that be?</i>		

Next, community leaders were given a list and asked how important it was for the CHNA Advisory Committee to address each **demographic group**. The majority of community leaders (80% or more) thought it was very important to address the following groups: people with mental illness, children, individuals living in poverty, teen or adolescents, and individuals addicted to drugs or alcohol. Other groups mentioned that were not directly mentioned to the community leaders included the underinsured, teen athletes, parents, grandparents raising their grandchildren, parents and family groups, those with long COVID, and residents without digital access.

Importance of Committee to Address Groups

Community leaders were also asked to list some **problems, barriers, or gaps in services** that prevent residents from receiving health related care and services they need. This was an open-ended question in which the respondent could give multiple responses. The most common barriers mentioned were transportation issues (42%), lack of awareness of available programs and resources (33%), cost (27%), and a limited workforce (22%).

Problems, barriers, or gaps in services		
	# of TOTAL Responses	% of Leaders
Transportation	46	42.2%
Knowledge of services	36	33.0%
Finances	29	26.6%
Limited workforce	24	22.0%

Total	244	(n=109)

Problems, barriers, or gaps in services

	# of TOTAL Responses	% of Leaders
--	----------------------	--------------

Question: What are some problems, barriers, or gaps in services that prevent residents from receiving health related care and services they need?

More than a third of community leaders, (35.5%), agreed that “It is easy to get information about health services that are available in the county” with 6.5% strongly agreeing. More than a third, (34.7%), disagreed with this statement. Less than a sixth of community leaders, (13.9%), agreed that “People in the community know about the health services and options that are available to them” with 3.3% strongly agreeing. Nearly two-third, (62.6%), disagree (15.4% strongly disagreed).

Agreement with Statements

Community leaders were asked what is being done well in the areas of health and quality of life. This was open ended question in which the respondent could give multiple responses. Nearly half of respondents (49%), mentioned improvements being made in many different health and quality of life areas. Additional things that are being done well in Stark County include, in order of importance, access to healthcare for all (19%), Stark Parks (16%), nutritious food opportunities (15%), and the THRIVE program (8%).

Being done well in Stark County

	# of TOTAL Responses	% of Leaders
Improving health and quality of life in many areas	47	49.0%
Access to healthcare for all	18	18.8%
Stark Parks	15	15.6%
Nutritious food opportunities	14	14.6%
THRIVE (infant mortality)	8	8.3%
Exercise activities	6	6.3%
Harm reduction techniques (addiction)	5	5.2%
COVID-19 vaccinations	4	4.2%
Project DAWN (Opioid Overdose Education Naloxone Distribution)	3	3.1%
Suicide contagion	3	3.1%
Environmental health	2	2.1%
Enrichment African American Wellness Fair and other activities	2	2.1%
Safe Kids (prevent injury)	1	1.0%

Being done well in Stark County		
	# of TOTAL Responses	% of Leaders

DEI in workplace (diversity, equity, inclusion)	1	1.0%
Monetary assistance	1	1.0%
General Practice Residency Dental clinics	1	1.0%
Total	133	(n=96)

Question: In your opinion, what is being done well in the Stark County in the areas of health and quality of life?

SOCIAL DETERMINANTS

SECONDARY DATA ANALYSIS

In terms of educational attainment for adults both ages 18 to 24 and 25 and older, the percentage of the population with a high school degree is slightly higher in the county than in the state. However, the percentage of the population with a Bachelor's degree or higher is significantly higher in the state than it is in the county.

Educational Attainment						
	2016	2017	2018	2019	2020	Change
Percentage that have high school degree or higher, ages 18-24						
Stark County	87.6%	88.0%	87.4%	88.1%	89.3%	+1.7%
Ohio	86.0%	86.4%	86.8%	87.0%	87.3%	+1.3%
Percentage that have high school degree or higher, ages 25 and older						
Stark County	90.4%	90.6%	91.3%	91.6%	92.1%	+1.7%
Ohio	89.5%	89.8%	90.1%	90.4%	90.8%	+1.3%
Percentage that have Bachelor's degree or higher, ages 25 and older						
Stark County	22.6%	22.8%	22.8%	22.8%	23.5%	+0.9%
Ohio	26.7%	27.2%	27.8%	28.3%	28.9%	+2.2%

SOURCE: U.S. Census Bureau, American Community Survey

The unemployment rate for the county in 2020 was the same as the state and country as a whole at 8.1%. The unemployment rate in the City of Canton was slightly higher at 10.0%. In all four geographies, the unemployment rate has increased by around 3% over the past five years. For this table, unemployment includes persons who were not employed, but who were actively seeking work, waiting to be called back to a job from which they were laid off, or waiting to report within thirty days.

Unemployment Rate, Annual Average (not seasonally adjusted)						
	2016	2017	2018	2019	2020	Change
Stark County	5.5%	5.2%	4.9%	4.6%	8.1%	+2.6%
Canton City	6.6%	6.2%	5.8%	5.2%	10.0%	+3.4%
Ohio	5.0%	5.0%	4.5%	4.2%	8.1%	+3.1%
United States	4.9%	4.4%	3.9%	3.7%	8.1%	+3.2%

SOURCE: U.S. Census Bureau, American Community Survey 5-Year Estimates

Looking specifically at the population in Stark County in poverty by key demographic measures, children under the age of 5 had the highest level of poverty (23.7%), while senior citizens had the lowest level (7.2%). Females were more likely than males to be in poverty (14.5% to 12.1%). In terms of race and ethnicity, Black and multi-racial respondents had the highest poverty levels (35.3% and 34.3%) followed by Hispanic or Latino (28.0%). Additionally, the lower the education level, the higher the poverty level for that demographic group (poverty rate for those with less than a high school diploma was 24.6% compared to 2.9% for college graduates). The poverty rate for the unemployed is nearly six times that of the employed population (34.8% compared to 6.3%).

SOURCE: U.S. Census Bureau, American Community Survey 5-Year Estimates

The poverty rates for female headed households, both overall and with children under 18, are approximately 4 times higher than married family households. Below are tables with poverty rates by zip code, both overall and by age group. Zip codes with higher-than-average poverty rates tended to be in the county's more urban areas. Highlighted zip codes have a higher percentage of population living below the poverty level than the county average (13.3%).

Stark County Percentage of Families in Poverty by Family Status							
	Pop-2020	2016	2017	2018	2019	2020	Change

The median monthly housing costs for mortgage holders as a percent of household income (homeowners) as well as median gross rent as a percent of household income (renters) is nearly identical for the state and the county. Severe renter cost burden means that at least half of household income is spent on housing. In Ohio, nearly a quarter of renters suffer from severe renter cost burdens, for the county, the percentage is slightly lower.

Homeowner Affordability, 2019		
	Median Monthly Housing Cost for Mortgage Holders	Median Monthly Housing Cost for Mortgage Holders as % of Household Income
Stark County	\$1,146	18.7%
Ohio	\$1,248	19.1%

^FHA guidelines state that a household should avoid buying a home that costs more than 2.5 times its annual income. Numbers in red are above the 2.5 threshold.

Renter Affordability, 2019			
	Median Monthly Gross Rent	Median Gross Rent as % of Household Income	Severe Renter Cost Burden
Stark County	\$728	27.1%	20.5%
Ohio	\$797	27.6%	23.0%

SOURCE: OHFA, Draft Ohio Housing Needs Assessment, Fiscal Year 2021 Annual Plan

While the number of homeless individuals in Stark County has decreased, (43%), since 2011, the number of individuals in permanent supportive housing (65%) and those at imminent risk of being homeless continued to rise (164%).

VOICES OF STARK COUNTY REPORT

Under the Social Determinants of Health **Economic Stability** domain, the following themes of identified challenges were outlined by participants:

1. Poverty and lack of economic stability are the root causes of inequities
2. More people are experiencing the “benefit cliff”, contributing to workforce shortage
3. Food insecurity due to lack of accessible and affordable food sources
4. Inflation and rising costs of basic needs
5. Employment, transportation, and childcare are all tied together
6. High administrative burden and low ceiling of eligibility for governmental programs
7. Minimum wage vs. living wage discrepancy

More specifically, the table below outlines participant responses from community stakeholders and service provider meetings in the **Economic Stability** domain.

Challenges and Strategies for Economic Stability Domain		
Population	Challenges	Strategies
Stark County Stakeholders	<ol style="list-style-type: none"> 1. Living in poverty and ALICE families 2. Employment 3. Food insecurity 4. Housing instability 	<ol style="list-style-type: none"> 1. Bring adult education to various communities instead of expecting people to travel (challenges with transportation). 2. Wrap Around services for anyone receiving governmental assistance & ALICE individuals. 3. Mobile workers (travel to various communities) to mentor, provide assistance with signing up for governmental programs/services, provide resources/knowledge on basic life necessities, “hand hold” in crisis, etc. 4. Employers receive subsidies to support employees’ needs of childcare and when needs arise to take time off to address personal issues/crises. 5. Bring services to communities (could be through remote access).
Community Health Workers, Family Support Specialists, and Home Visitors	<ol style="list-style-type: none"> 1. Lack of paternal support & involvement in female head of households living in poverty 2. Employment 3. Housing instability 4. Lack of trust in governmental system 	<ol style="list-style-type: none"> 1. Affordable and accessible drivers ed training, especially for “older adolescents, young adults.” 2. Infrastructure rehaul of governmental system of assistance. 3. Employers offer incentives or tokens of appreciation for those who consistently are “good” employees. 4. Housing: <ol style="list-style-type: none"> a. Rent to own homes (sense of pride if homeowner). b. Subsidized housing: rent incrementally increases as person becomes more financially secure. c. Education on how to obtain and keep a home (similar to Habitat for Humanity).

Challenges and Strategies for Economic Stability Domain		
Population	Challenges	Strategies
Community Health Workers, Family Support Specialists, and Home Visitors		5. Navigator/mentor for those in cyclical poverty to provide assistance for governmental programs (bureaucracy) and resource connections, and all around social network support (“someone in their corner”).
Health Care Professionals	<ol style="list-style-type: none"> Poverty is the key to instability We cannot forget about the elderly as a struggling population as they are on a fixed income and likely have health issues 	<ol style="list-style-type: none"> For those on any government assistance: <ol style="list-style-type: none"> Slow incremental increase/decrease of governmental aid. Financial/budget training. Provide vocational training to attain skills for various employment opportunities (build upon current skill set and what motivates individual). More employers either provide childcare or help subsidize costs.

Under the Social Determinants of Health **Access and Quality of Education** domain, the following themes of identified challenges were outlined by participants:

- Expectations of schools and teachers exceed primary role of educating youth
- Lack of workforce to deal with students struggles both academically and emotionally
- Lack of affordable, accessible, and high-quality childcare and preschools
- Resource allocations to the neediest of students; what are the supports for others?
- Do people understand the value of an education and how it ties into their well-being?
- Difficult to obtain adult education in terms of locality and cost

More specifically, the table below outlines participant responses from community stakeholders and service provider meetings in the **Access and Quality of Education** domain.

Challenges and Strategies for Access and Quality of Education Domain		
Population	Challenges	Strategies
Stark County Stakeholders	<ol style="list-style-type: none"> Lack of social support Students are struggling School based Mental Health services Lack of early education for students and adults focusing on resilience and prevention efforts Lack of affordable preschool programs Safety at school 	<ol style="list-style-type: none"> More family services to help educate the family as a whole (wraparound services). Resume Life Skills classes. Peer to peer awareness and education of staff and students. Workforce retention initiatives. Dedicated Mental Health Teams at districts or buildings to offload work from those who aren't trained in those areas. Increased presence of behavioral health education in curriculum. Educate to each student's capabilities.
Community Health Workers, Family Support	<ol style="list-style-type: none"> Lack of necessary supplies to obtain/complete education 	<ol style="list-style-type: none"> Resume Life Skills Classes. Engage parents.

Challenges and Strategies for Access and Quality of Education Domain		
Population	Challenges	Strategies
Specialists, and Home Visitors	<ol style="list-style-type: none"> 2. Students concerns/societal concerns of social status 3. Extreme focus on state testing and teaching for this instead of preparing for real life 4. Lack of financial guidance to assist in pursuit of higher education 5. Excessive peer influence 6. Schools have had to take on multiple roles (parenting, disciplinarian, social worker, address mental health, etc.) which takes away from the purpose of educating 7. Too much focus on technology without placing safety parameters 8. Bullying and gun violence 9. Lack of standardized and free early childhood education 10. Primary education not valued as important 11. Lack of respect, pay, and professionalism for the Early Childhood workforce 12. Transition youth (17/18 years old) 13. Truancy 	<ol style="list-style-type: none"> 3. Resume teaching cursive writing (teach how to write a signature). 4. Mentoring programs. 5. Some career tech classes in each high school that may not require a further degree. 6. Incremental programming in schools tied to how kids learn best (in classroom and/or virtual) and what other supports need to ensure success.
Health Care Professionals	<ol style="list-style-type: none"> 1. Traumatic experiences and untreated MH challenges have led to people struggling or not completing their primary education 2. Pandemic has caused loss of learning for students 	<ol style="list-style-type: none"> 1. More schools trained in trauma focused relationship building. 2. For those with MH challenges, create models for learning tied to student learning styles (individualized education). 3. Screen all students periodically for MH challenges and refer appropriately to identify and treat early.

Under the Social Determinants of Health **Neighborhood and Built Environment** domain, the following themes of identified challenges were outlined by participants:

1. Lack of or difficulty with broadband internet connectivity
2. Lack of affordable, accessible, and flexible public transportation and ride share services
3. Lack of safe and reliable housing
4. Lack of safe green spaces with sidewalks to encourage healthy living
5. Lack of resources in own communities
6. Increasing crime and violence
7. Lack of access to healthy food

More specifically, the table below outlines participant responses from community stakeholders and service provider meetings in the **Neighborhood and Built Environment** domain.

Challenges and Strategies for Neighborhood and Built Environment Domain		
Population	Challenges	Strategies
Stark County Stakeholders	<ol style="list-style-type: none"> 1. No access to healthy recreation 2. High crime/violence 3. Low-income housing in unsafe neighborhoods 4. Many communities are “deserts” 	<ol style="list-style-type: none"> 1. Safe, attractive housing. 2. Policing and safety officers. 3. Improve public transportation access.
Community Health Workers, Family Support Specialists, and Home Visitors	<ol style="list-style-type: none"> 1. Gun violence and gangs 2. Quality and location of housing has deteriorated; slumlords; no accountability of owners to provide safe and clean housing for renters 3. Transportation challenges 4. Access to healthy food 	<ol style="list-style-type: none"> 1. SARTA should have multi language signs (e.g., Spanish). 2. Food banks: <ol style="list-style-type: none"> a. Choices should be healthy. b. Provide all supplies to make meals. c. Supplies should have multi meal capacity. 3. Healthy food choices education as part of mandatory “live” health class in high school. 4. Up to date resource on food and shelter services (easy access and in real time).
Health Care Professionals	<ol style="list-style-type: none"> 1. With limited resources both monetary and ease of access, difficult to purchase healthy food choices 2. Limited access and schedules of public transportation 3. With increasing crime/violence, fear to leave home and have apathetic feelings or acceptance of “this is the norm” 4. No accountability for landlords in maintaining quality and cost of rental homes 	<ol style="list-style-type: none"> 1. Community programs on healthy eating and food choices, and how they affect health. 2. Supportive housing allotments for most vulnerable individuals with each unit having an assigned Case Manager who functions to: <ol style="list-style-type: none"> a. Assist with grocery shopping and education on healthy foods. b. Connects to resources and governmental programs. c. Connects to vocational training/education attainment. d. Provides handholding in times of crisis and mentoring at all other times. e. Once individual is “stable” relocate to different housing that is tiered “down” with level of assistance. 3. Year round traveling fresh food markets to vulnerable communities with more frequency. 4. Restaurants/grocery stores donate their excess fresh foods to churches/community centers to distribute to residents (would decrease the transportation issue and increase ease of access).

Under the Social Determinants of Health ***Social and Community Context*** domain, the following themes of identified challenges were outlined by participants:

1. Lack of collective collaboration and allocation of equitable resources
2. Lack of community centers/local programming which contributes to lack of cohesion
3. Political polarization contributes to discrimination of marginalized populations
4. Pandemic has prompted continued self-isolation and loss of community cohesiveness

More specifically, the table below outlines participant responses from community stakeholders and service provider meetings in the ***Social and Community Context*** domain.

Challenges and Strategies for Social and Community Context Domain		
Population	Challenges	Strategies
Stark County Stakeholders	<ol style="list-style-type: none"> 1. Nonprofits compete for funding and pull from same resource pool 2. Social isolation and fear with the current pandemic 3. Formal vs Informal (grass roots) organizations and public vs. private organizations: both have lack of collaboration 4. Many people do not feel like they have a voice in the community 	<ol style="list-style-type: none"> 1. Collaborative funneling approach of resources within the community instead of fragmented access. 2. MH community training. 3. Provide opportunities of networking for connecting community-based organizations that can help each other in the process of servicing the communities.
Community Health Workers, Family Support Specialists, and Home Visitors	<ol style="list-style-type: none"> 1. Post incarceration, challenges with obtaining housing and employment (basic needs) 2. Societal discrimination even within own communities 3. Extreme social isolation in the pandemic without ease of access to social network or community programs 4. Lack of coordination between multiple community programs serving same individuals 5. LGBTQ+ Individuals 	<ol style="list-style-type: none"> 1. Get faith-based communities involved to assist with childcare in their community (It takes a village...). 2. Resurrect neighbors being neighbors to look out for each other; sense of community. 3. Neighborhood stores with healthy options; place to safely socialize. 4. Establish relationship with CHW/FSS/HV for upcoming parolees and their Parole Officers prior to release; assist with "life" once released. 5. Increase use of virtual Parent Cafes to create a sense of social network and provide education 6. Have a strong databank/hub of resource. information in real time that can be accessed by the community, navigators, & mentors that would also allow referrals and connections directly to the resources. 7. Support for LGBTQ+: <ol style="list-style-type: none"> a. Education about tolerance and acceptance. b. Diversity groups in schools for honest conversations without judgment.
Health Care Professionals	<ol style="list-style-type: none"> 1. The Pandemic has prompted increased social isolation and 	<ol style="list-style-type: none"> 1. Community groups, churches, and neighbors go to homes of those who have isolated themselves

Challenges and Strategies for Social and Community Context Domain

Population	Challenges	Strategies
Health Care Professionals	<p>disconnection from community, which increases mental illness and substance use</p> <p>2. History of incarceration affects access to governmental aid programs, employment, and access of basic resources</p>	<p>and extend their “hands” out to increase the human connection.</p> <p>2. More support for individuals returning to the community from incarceration in the form of mentoring and case management, from a positive viewpoint and not punitive viewpoint.</p>

ISSUE 1: ACCESS TO HEALTH CARE

COMMUNITY HEALTH LEADER SURVEY

The community leaders were given a list of three statements about access to care issues and asked how much they agreed with each. The low amount of agreement on all three statements supports that access to care is an issue in Stark County. Each statement is discussed in more detail below.

- Less than half of community leaders, (44.4%), agreed that “*Stark County has the needed programs and resources to address health related issues*” with 7.3% strongly agreeing. Less than a quarter, (23.4%), disagreed.
- Less than a third of community leaders, (43.2%), agreed that “*The community members I interact with generally feel that medical providers listen to them*” with 4.8% strongly agreeing. One fifth, (20.0%), disagreed.
- Less than half of community leaders, (48.0%), agreed that “*Residents in Stark County are able to access a primary care doctor when needed*” with 8.0% strongly agreeing. Nearly a quarter, (24.0%), disagreed with this statement.

Agreement with Access to Care Statements

SECONDARY DATA ANALYSIS

The table below represents the estimated percent of the population under age 65 that has no health insurance coverage in Stark County. Over the past five years, the percentage of individuals without health insurance decreased by 3.5%. The percentage of residents without insurance is significantly higher for Black residents (7.5%) than White residents (5.1%). In addition, the percentage of residents without insurance under the age of 19 (3.1%) is significantly lower than the percentage of residents ages 19 to 64 (8.4%).

Stark County Percent Uninsured

Primary Care Physicians is the ratio of the population to total primary care physicians. Primary care physicians include non-federal, practicing physicians (M.D.'s and D.O.'s) under age 75 specializing in general practice medicine, family medicine, internal medicine, and pediatrics. In Ohio, there is 1 Primary Care Physician for every 1,290 residents which is nearly identical to the county ratio.

Primary Care Physicians											
	2015		2016		2017		2018		2019		% Change

Less than one-sixth of Stark County youth, (14%), have not always been able to get medical or psychological care when they thought they needed it during the school year. The most common reason for not being able to get needed medical or psychological care was they didn't know who to go see.

Youth: Always Been Able to Get Needed Medical or Psychological Care

Top Reasons for No Access:

1. Didn't know who to go see
2. Didn't have transportation
3. My parent or guardian did not go with me
4. Didn't want my parents to know

SOURCE: 2021 Northeast Ohio Youth Health Survey

VOICES OF STARK COUNTY REPORT

Under the **Access and Quality of Healthcare** domain, the following themes of identified challenges were outlined by participants:

1. Difficult to access providers (workforce, insurance, availability, proximity, and costs)
2. Extremely difficult system to navigate
3. Lack of awareness about options in own community
4. Cultural bias and stigma
5. Insurance complexities and disparity of reimbursement (services, locations, etc.)

More specifically, the table below outlines participant responses from community stakeholders and service provider meetings in the **Access and Quality of Healthcare** domain.

Challenges and Strategies for Access and Quality of Healthcare Domain		
Population	Challenges	Strategies
Stark County Stakeholders	<ol style="list-style-type: none"> 1. Cultural challenges 2. Provider issues 3. Lack of health literacy 4. Lack of insurance coverage and/or complexity of fee structure 5. Other challenges <ol style="list-style-type: none"> 1. Difficult to navigate and understand the complexities so not willing to seek help 2. Childcare not easily attainable 3. Lack of knowledge of resources in own community 4. Lack of integrated care options to provide one stop shop 	<ol style="list-style-type: none"> 1. Bring services to the low-income communities. 2. Urgent Care for mental health illnesses. 3. Low cost and ease of access transportation service programs. 4. Sliding fee scales in all organizations and this info is known upfront. 5. BH counselor in primary care setting. 6. More Telehealth access (technology and cost). 7. Having someone in place (doctor office, hospitals) to help people navigate (like a healthcare concierge).
Community Health Workers, Family Support Specialists, and Home Visitors	<ol style="list-style-type: none"> 1. Lack of workforce and consistent providers 2. Payers panel of providers not up to date with information; frustrating for people to navigate especially if on Medicaid (stigma) 3. Lack of knowledge of various resources (lack of right information in the hands of the right people) 4. Difficult to communicate with providers 5. Disparity in reimbursement for BH services 6. Lack of reliable transportation, even with using Payer approved services 7. Consequence of pandemic: Case Managers themselves are struggling and are not helpful to their clients 	<ol style="list-style-type: none"> 1. Educate providers on impact of socio-economic challenges and prioritization of meeting basic needs first. 2. Provide variety of appointments to include voice only/telehealth and variety of times, including nontraditional business hours. 3. One stop shop when clients seek MH services. 4. Healthcare navigators.

Challenges and Strategies for Access and Quality of Healthcare Domain		
Population	Challenges	Strategies
Community Health Workers, Family Support Specialists, and Home Visitors	<ul style="list-style-type: none"> to provide care coordination and “putting out life’s fires” 8. Imbalance of treatment measures: overmedicating and less talk therapy (social connectedness may be all someone needs) 9. Underinsured families 	
Health Care Professionals	<ul style="list-style-type: none"> 1. Extremely complex system to navigate 2. Lack of health literacy 3. People struggle to meet basic needs; many do not have resources or knowledge on how to meet these needs 	<ul style="list-style-type: none"> 1. Every individual should have an advocate/case manager to help navigate. 2. Increase community education to understand tiers of care and navigation of healthcare intricacies. 3. More offices participating in integrative medicine embedding mental health services in the primary care offices (allows for patient to be treated as a whole instead of through fragmented providers). 4. Increase number of accessible rideshare programs reimbursable by insurance payers even for emergency appointments. 5. Support providers to ensure their well being.

ISSUE 2: ADDICTION AND SUBSTANCE ABUSE

STARK COUNTY COMMUNITY POLL

Substance Abuse and Addiction Treatment

When asked how serious a problem marijuana use is in Stark County, less than half, (43.1%) felt it was a serious problem with 18.4% reporting it was a very serious problem. More than a quarter (29.2%) said it was not a problem at all. Overall, respondents rated marijuana about the same as in 2020.

Seriousness of Marijuana in Stark County

When asked how serious a problem e-cigarette or vape use by youth is in Stark County, nearly three-quarters, (73.9%) felt it was a serious problem with 36.6% reporting that youth vaping was a very serious problem. This was a slight decrease from 2020 when 78.5% felt that e-cigarette or vape use by youth was a serious problem. About one in ten (9.5%) said it was not a problem at all.

Seriousness of Vaping in Stark County

When asked to rate their level of agreement with five statements about addiction, respondents were most likely to agree that addiction can affect anyone (92.6%), addiction is a disease (62.9%), and every individual seeking addiction treatment needs to begin with a detox program (54.5%).

Agreement with Statements

Respondents were asked to rate how easy it is for youth to obtain alcohol in their community. More than half (63.1%) said it was either extremely easy (31.6%) or slightly easy (31.5%). Groups more likely to say it is easy for youth to obtain alcohol include employed and retired respondents.

Those who said it was easy for youth to obtain alcohol were asked how they think youth do so. The most popular responses were older friends (27.6% of answering respondents), followed by other adults (19.3%), and at local establishments that either do not check ID or with a fake ID (15.2%).

Ease of Youth Obtaining Alcohol

Where do you think Youth Obtain Alcohol

	# of responses	% of responses	% of ALL respondents
Older friends	96	27.6%	16.0%
Adults	67	19.3%	11.2%
No ID/Fake ID at local establishments	53	15.2%	8.8%
At home	45	12.9%	7.5%
Parents	39	11.2%	6.5%
Family members	25	7.2%	4.2%

The table below represents the percentage of unduplicated clients in treatment with a primary diagnosis of opiate use disorder. On average, 36% percent of client admissions in the county were associated with a primary diagnosis of opiate abuse or dependence in SFY 2020, a slight decrease from SFY 2016. It should be noted that this data comes from the Ohio Mental Health & Addiction Services (OhioMHAS) Multi Agency Community Information System (MACSIS). While MACSIS data is required to be submitted for billing purposes, there are minimal sanctions for failing to submit so underreporting of these numbers is likely. It should also be noted that reported data only reflects information for clients whose treatment was provided with public dollars, thus private insurance and self-pay clients are not reflected in this data.

Percentage of Unduplicated Clients - Treatment for Opiate Use Disorder

	SFY 2016	SFY 2017	SFY 2018	SFY 2019	SFY 2020	Change
Stark County	40.0%	34.9%	33.2%	34.2%	36.1%	-3.9%
Ohio	49.9%	48.1%	49.4%	48.4%	49.4%	-0.5%

The table below examines per capita distribution of prescription opioids with data from The Ohio State Board of Pharmacy's Ohio Automated Rx Reporting System (OARRS). Doses per capita is a measure that gives the average number of doses dispensed for each individual resident in a county in a year. Rates are likely underestimated because data from drugs dispensed at physician offices and the Veteran's administration are not included in the calculations. In 2021, the rates for the county were slightly higher than the state. Over the five-year time span in which data is available, rates have decreased in both the county and the state.

Prescription Opioid Doses per Capita

	2017	2018	2019	2020	2021	Change
Stark County	51.8	43.1	38.3	34.1	29.8	-22.0
Ohio	49.3	40.5	36.0	30.4	27.2	-22.1

YOUTH SURVEY

Nearly a third of middle and high school youth reported using some illegal substance sometime in their lifetime with 13% using an illegal substance sometime in the past 30 days. The most common substances used were alcohol and marijuana.

Youth: Substance Abuse

Source: 2021 Northeast Ohio Youth Health Survey

Less than one-twentieth of students, (4.3%), reported binge drinking at least one day in the past 30 days. Older students were more likely than younger students to have engaged in binge drinking in the past 30 days.

Youth: # of Days Binge Drinking in Past 30 Days by Grade

Source: 2021 Northeast Ohio Youth Health Survey

Nearly a quarter of Stark County middle and high school students, (24.1%), reported that someone in their household had used the substances below, not including alcohol, during this past school year. Marijuana was the most common substance used.

Youth: Substance Use by Others in Household

Source: 2021 Northeast Ohio Youth Health Survey

In addition, youth were asked how much of a risk they felt several different things would be to them. In terms of having 5 or more alcoholic drinks 1 or 2 times a week, more than two-thirds of surveyed youth, (69%), reported this to be a moderate or great risk. Female students were more likely than male students

to indicate having 5 or more drinks was a moderate or greater risk. In general, older students tended to be more likely than younger students to feel that this was a risk.

YOUTH: Perceived Risk- 5 or more drinks 1 or 2 times a week

In terms of using tobacco such as cigarettes, e-cigarettes or vaping and chew, more than half of surveyed youth, (57%), reported this to be a moderate or great risk. Female students were more likely than male students to indicate that tobacco use was a moderate or greater risk. In general, younger students were more likely than older students to feel that tobacco use was a risk.

YOUTH: Perceived Risk- Tobacco (cigarettes, e-cigs/vape, chew)

In terms of marijuana use, more than half of surveyed youth, (57%), reported this to be a moderate or great risk. Female students were more likely than male students to indicate marijuana use was a moderate

or greater risk. In general, younger students were more likely than older students to feel that marijuana use was a risk.

YOUTH: Perceived Risk- Marijuana

In terms of prescription drugs that are not prescribed to them, more than three-quarters of surveyed youth, (79%), reported this to be a moderate or great risk. Female students were slightly more likely than male students to indicate prescription drug use was a moderate or greater risk. In general, older students tended to be more likely than younger students to feel that this was a risk.

YOUTH: Perceived Risk- Prescription drugs not prescribed

ISSUE 3: INFANT MORTALITY AND MATERNAL HEALTH

COMMUNITY LEADER SURVEY

Less than half of community leaders, (40.8%), agreed that “Family planning services are accessible and available to adequately address the reproductive health needs in the community,” with 7.2% strongly agreeing. One fifth, (20.0%), disagreed with the statement.

Family Planning Services are Accessible and Available

SECONDARY DATA ANALYSIS

The table below shows the number and percentage of births in Stark County over the past five years by race.

Stark County Overall Births by Race										
	Overall		Hispanic/Latino		Non-Hispanic Black		Non-Hispanic White		*Other/Unknown

Number of all infant deaths (within 1 year), per 1,000 live births, SOURCE: ODH, Ohio Infant Mortality Report

Infant Mortality Rate (IMR) is calculated by the number of infant deaths over the number of live births multiplied by 1000. The infant mortality rate for all races (5.4) is much higher than the rate for White babies in Stark (3.8).

Stark County Infant Mortality Rate by Race

Stark County Infant Mortality Rate by Race					
	2015	2016	2017	2018	2019
White	4.2	8.0	8.7	6.7	3.8
All Races	4.8	9.0	9.5	6.4	5.4

Rate is per 1,000 births, SOURCE: Ohio Department of Health.

When combining data into three-year groupings, the infant mortality rate for Black babies (12.80 per 1,000 live births) is more than twice as high than White babies (5.26 per 1,000 live births) in the county. Overall, the infant mortality rate for the county is nearly identical to the infant mortality rate of the state (6.53 per 1,000 live births). Please note that over this 7-year period, there were 8 total infant deaths in the Hispanic/Latino community.

Infant Mortality Rates per 1,000 Live Births In 3-year groupings

MATERNAL HEALTH FOCUS GROUP

- **COST IS THE MAJOR BARRIER** - Cost was mentioned in nearly every aspect of the focus group as having a negative effect on a person's ability to get the healthcare they need. Even when talking about health insurance, cost was a major factor- with high premiums, deductibles and out of pocket expenses. Cost was also mentioned as a barrier for women getting needed prenatal care. Other barriers mentioned, including transportation and not being able to take off work to see the doctor can also be linked to financial burden.
- **WOMEN TEND TO PUT OTHERS NEEDS BEFORE THEIR OWN** - Women tend to have multiple responsibilities and tend to put the healthcare needs of others they care for before their own needs. In addition, women feel guilty taking time from work to go to the doctor for themselves, instead saving their time off (if they even get paid time off) to take care of others.
- **RACE, AGE, INCOME, AND NOT LOOKING LIKE EVERYONE ELSE HAVE A NEGATIVE EFFECT ON HEALTHCARE** - Black women and younger people have a harder time being taken seriously by health professionals and are more likely to be seen as drug seekers. Lower income individuals are more likely to be turned away from receiving the care they need and more likely to only have their symptoms treated as opposed to having the underlying condition identified. Overweight individuals and those with visible tattoos were also mentioned as more likely to have a negative experience when they attempt to get healthcare.
- **COMMUNICATION AND INFORMATION:**
 - The way that doctors and nurses communicate with patients has a direct impact on their willingness and comfort level to ask questions regarding their health. When a patient feels their questions are not taken seriously and are embarrassed by the encounter, it not only affects their comfort level in asking additional questions, but it may make them less likely to go to the doctor at all in the future.
 - A recurring theme when asked about what attracts participants to health-related information was that they would like information that is straight and to the point, no fluff; with instruction on where they can look for additional information if they need it. Also, they want to see people on brochures that look like them (diverse group of people), but they must look natural and not fake.

	465	(n=465)	(n=600)

Question: If you or a member of your family were in need of mental health services, where are you most likely to go?

Over half (52.7%) reported having discussed mental health issues with their health care provider, an increase from 46.8% in 2020. Groups of respondents more likely to discuss mental health issues with their healthcare providers include females and those with children in the home. Of those who have discussed mental health with their health care provider, the majority, (82.9%), found the discussion to be valuable with 41.0% reporting the discussion to be very valuable and another 41.9% reporting that it was somewhat valuable.

Healthcare Provider Discuss Mental Health

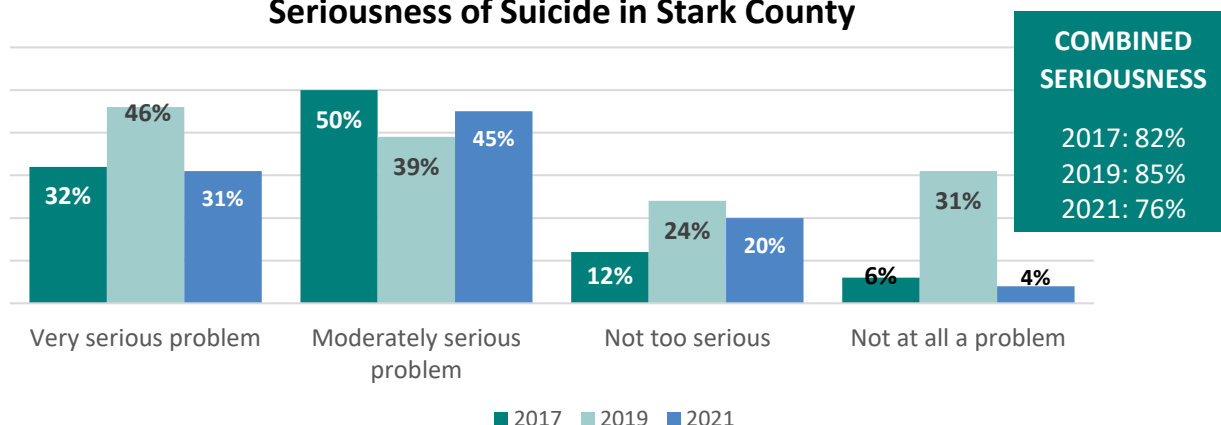

Value of Mental Health Discussion

(Of those who discussed mental health with provider)

Respondents were asked to rate the seriousness of suicide in Stark County. Nearly a third (31.0%) said it was a very serious problem while nearly half (45.4%) said it was moderately serious. Groups that were more likely to rate suicide as a serious problem include non-White respondents and those with incomes below \$25,000 per year.

Seriousness of Suicide in Stark County

Respondents were read a list of five barriers and asked if any of the barriers would prevent them from helping someone close to them who was thinking about suicide.

- The most common barrier was **not knowing what to say or do**, with 29.5% of respondents naming this as a barrier, a slight increase from 27.6% in 2020.
- More than one-sixth of respondents, (17.7%), reported that **being afraid that there is nothing they could do to help a person** would stop them from helping someone considering suicide, a slight increase from 15.3% in 2020.
- Slightly fewer, (16.5%), reported that **being afraid that they would make the person feel worse** would stop them from helping someone considering suicide. This was also a slight increase from 2020 when 16.5% named this as a barrier.
- More than one-tenth of respondents, (15.7%), reported that **being afraid that talking about it would make the person attempt suicide** would stop them from helping someone considering suicide, an increase from 11.2% in 2020.
- Just 7.0% of respondents reported that **not wanting to get involved** would stop them from helping someone considering suicide, a slight increase from 5.6% in 2020. Groups most likely to indicate this was a barrier include males and those ages 18-44.

Barriers to Helping Someone Thinking about Suicide

Two thirds of respondents (66.6%) said they know where to go if a friend or family member was thinking about suicide. When asked to say where they would go, more than a third (38.0%) said a suicide prevention hotline. More than one in ten said a crisis center (15.7%) and a hospital ER (11.3%). Other responses are outlined in the table below.

Know Where to Go if Friend/Family Thinking about Suicide

Where would you go for suicide prevention?			
	# of responses	% of responses	% of ALL respondents
Suicide prevention hotline	145	38.0%	24.2%
Crisis Center	60	15.7%	10.0%

Drug/Alcohol abuse	33	6.5%	5.5%
Feeling of hopelessness	22	4.3%	3.7%
Not knowing help is available	17	3.4%	2.8%
Bullying	16	3.2%	2.7%
Mental disorders	15	3.0%	2.5%
Access to lethal means	7	1.4%	1.2%
	506	(n=506)	(n=600)

About a third of respondents, (33.8%), reported a negative change in their day-to-day mood, mentality, or general outlook in the past year. About a quarter, (24.5%), reported new feelings of isolation, disconnection, or loneliness. About one in ten reported feeling the desire to seek counseling or therapy for the first time (11.0%), increased use of legal or illegal substances (10.8%), and suicidal thoughts or thoughts about harming themselves (9.7%).

Experiences in the Past Year

Two-thirds, (66%), of respondents agreed they are comfortable talking about suicide with their health provider. Slightly less, (64%), agreed that most people who die by suicide show signs beforehand. More than half, (59%), agreed that they are comfortable talking about suicide with family/friends. Half, (50%), agreed they would recognize if someone they cared about was thinking about suicide. Significantly less, (11%), agreed that if someone wants to die by suicide, there is nothing anyone can do to help them.

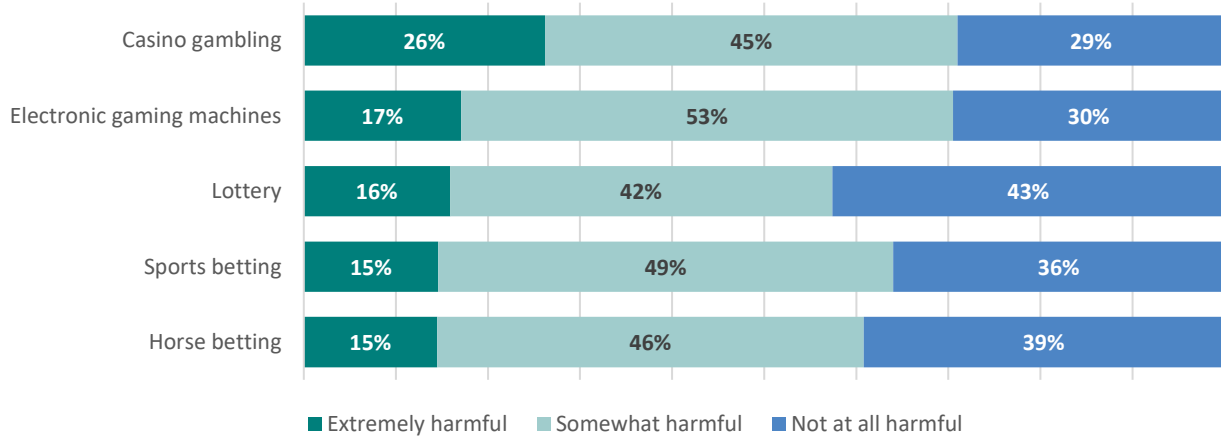

Agreement with Statements

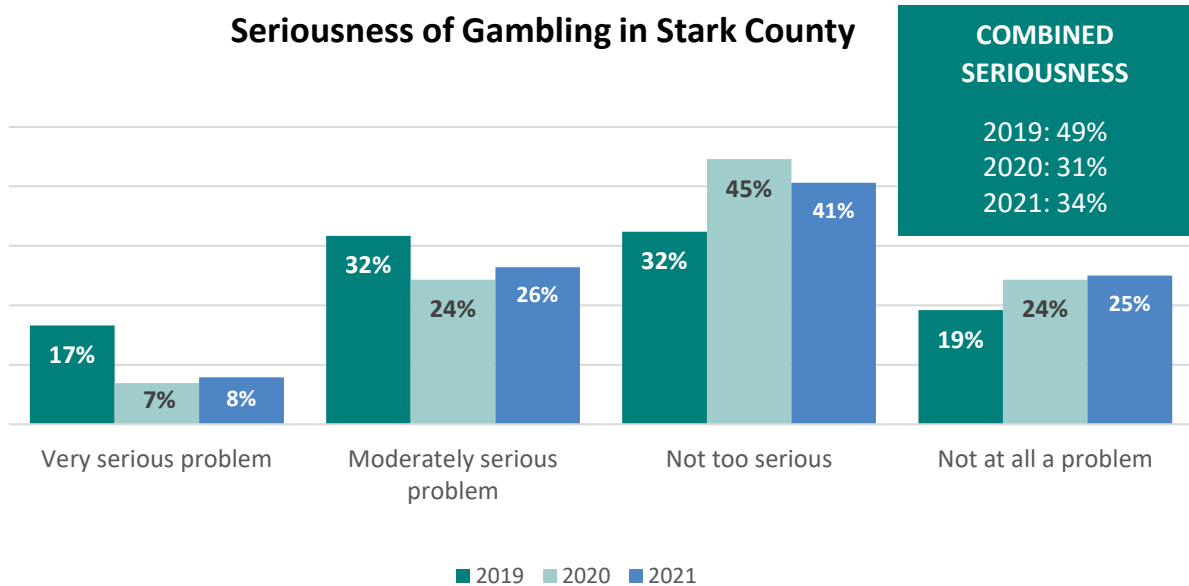

Respondents were asked to rate the harmfulness of five gambling activities. The activity that was rated extremely harmful most often was casino gambling (26.2%). Fewer than one in five respondents rated the remaining activities as extremely harmful.

Harmfulness of Gambling Activities

When asked how serious a problem gambling is in Stark County, about a third, (34.3%) felt it was a serious problem with just 7.9% reporting that gambling was a very serious problem. This was a slight increase from the previous year when 31.2% indicated that gambling in the county was a serious problem. In 2021, one-quarter of respondents (25.0%) said it was not a problem at all. Groups of respondents more likely to indicate that gambling was a serious problem in the county include those with an annual income under \$50,000 and respondents with children in the home.

Seriousness of Gambling in Stark County

When asked where they would go if they or someone they knew were struggling with a gambling addiction or how much they gamble, the most common responses were Gambler’s Anonymous (33.0% of answering respondents) and a hotline (20.9%). Other places respondents would go for help include the internet (12.1%), psychologist (6.9%), church (4.2%), mental health provider (4.2%), rehabilitation center (4.2%), and friends or family (3.9%).

Where would you go for Gambling Issue?			
	# of responses	% of responses	% of ALL respondents
Gamblers Anonymous	101	33.0%	16.8%
Hotline	64	20.9%	10.7%
Internet	37	12.1%	6.2%

Question: Where would you go if you or someone you know is struggling with a gambling addiction or how much they gamble?

SECONDARY DATA ANALYSIS

Mental Health Providers refers to the ratio of the county population to the number of mental health providers including psychiatrists, psychologists, licensed clinical social workers, counselors, marriage and family therapists, mental health providers that treat alcohol and other drug abuse, and advanced practice nurses specializing in mental health care. In Ohio, there is 1 Mental Health Provider for every 350 residents. The ratio in Stark County is slightly better.

Mental Health Providers											
	2017		2018		2019		2020		2021		Change
	# of Provider	Ratio	# of Provider	Ratio	# of Provider	Ratio	# of Provider	Ratio	# of Provider	Ratio

YOUTH SURVEY

The graph below shows the negative life experiences that Stark County students have experienced during the past 12 months. For nine of the ten life experiences included below the percentage of female students who reported experiencing each was higher than the percentage of male students. The most common negative life experiences were getting a bad grade on a test, having a family member who died or were very sick, parents taking away electronics, and a serious argument with a family member or friend.

Negative Life Experiences- Past 12 months

Source: 2021 Northeast Ohio Youth Health Survey

The graph below shows the most common adverse life experiences that Stark County students have experienced during their lifetime. For all six life experiences included below the percentage of female students who reported experiencing each was higher than the percentage of male students. The most common adverse life experiences were that their parents are separated or divorced and that they live with someone who was depressed, mentally ill, or suicidal.

Youth: Adverse Life Experiences

Source: 2021 Northeast Ohio Youth Health Survey

More than a third of students, (34.5%), reported they have been told by a health care professional they had a mental health issue before the current school year. The most common mental health issues for female students were anxiety and depression. For male students, the most common issues were ADD/ADHD and anxiety.

Youth: History of Mental Health Issues

Source: 2021 Northeast Ohio Youth Health Survey

More than one in five, (21%), middle and high school students reported experiencing bullying sometime in the past 12 months. Significantly more female students than male students reported being bullied in the past 12 months. Also, the younger the student, the more likely they were to have been a victim of bullying in the past year.

Experienced Bullying in Past 12 Months

Source: 2021 Northeast Ohio Youth Health Survey

More than one in five, (21%), middle and high school students answered yes to one of these four questions regarding Youth Suicide Risk:

1. In the past few weeks, have you wished you were dead?
2. In the past few weeks, have you felt that you or your family would be better off if you were dead?
3. In the past week, have you been having thoughts about killing yourself?
4. Have you ever tried to kill yourself?

Female students were more than twice as likely as male students to answer yes to one of these questions. Additionally, high school students were more likely than middle school students to answer yes to one of these questions. In terms of sexual orientation and gender identity, gay or lesbian and bisexual students were four times as likely to answer yes to one of the four questions than straight students. Likewise, transgender students were four times as likely than non-transgender students to answer yes to one of the four suicide risk questions.

ISSUE 5: OBESITY AND HEALTHY LIFESTYLE CHOICES

COMMUNITY LEADER SURVEY

Community leaders were also asked what challenges they feel people in the community face when trying to maintain a healthy lifestyle. This was an open-ended question in which the respondent could give multiple responses. The most common responses mentioned were having access to healthy food, (44%); affordability, (38%); safe outdoor green space, (28%); health literacy, (20%) (information overload); time, (14%) (busy schedules); transportation, (11%); social determinants, (11%), and motivation, (11%).

“I think there are a lack of opportunities for people to have somewhere safe within walking distance to exercise. Also, childcare for people who would like to exercise. I also believe that it is difficult for people to 'add' one more thing so helping to integrate healthy lifestyles into everyday living would be helpful.

Respondent on challenges residents face maintaining healthy lifestyle

Challenges that keep people from being healthy		
	# Responses	% of Leaders
Nutritious food to buy and prepare	49	44.1%
Affordability	42	37.8%
Safe outdoor green space	31	27.9%
Health Literacy	22	19.8%
Time	15	13.5%
Transportation	12	10.8%

Preventable hospital stays are measured as the hospital discharge rate for ambulatory care-sensitive conditions per 1,000 Medicare enrollees. Ambulatory-care sensitive conditions (ACSC) are usually addressed in an outpatient setting and do not normally require hospitalization if the condition is well-managed. Hospitalization for diagnoses treatable in outpatient services suggests that the quality of care provided in the outpatient setting was less than ideal. The measure may also represent a tendency to overuse hospitals as a main source of care. Over the past four years, the number of preventable hospital stays has decreased by more than 14% in both the county and the state.

Preventable Hospital Stays					
	2016	2017	2018	2019	Change
Stark County	4,336	4,100	4,008	3,710	-14.4%
Ohio	5,135	5,168	4,901	4,338	-15.5%

OTHER ISSUES: TRANSPORTATION

COMMUNITY LEADER SURVEY

A quarter of community leaders, (24.8%), agreed that “Transportation services for medical/mental health appointments are available for residents in Stark County when needed,” with 6.4% strongly agreeing. Over a third, (39.2%), disagreed with the statement.

Transportation Services are Available for Health Appointments

SECONDARY DATA ANALYSIS

Driving alone to work is the percentage of the workforce that usually drives alone to work. The numerator is the number of workers who commute alone to work via a car, truck, or van. The denominator is the total workforce. Driving alone to work is an indicator of poor public transit infrastructure and sedentary behaviors. Most of the workforce in Stark County, (84%), drives alone to work.

Driving Alone to Work: % of the workforce that drives alone to work						
	2016	2017	2018	2019	2020	Change
Stark County	85%	85%	85%	85%	84%	-1%
Ohio	83%	83%	83%	83%	82%	-1%

SOURCE: County Health Rankings

Among workers who commute in their car alone, the percentage that commute more than 30 minutes in Stark County was 26%, slightly lower than the state percentage of 31%.

Long Commute Driving Alone to Work: % of that drives alone to work that commute <30 minutes						
	2012-2016	2013-2017	2014-2018	2015-2019	2016-2020	Change

OTHER ISSUES: ENVIRONMENTAL QUALITY

SECONDARY DATA ANALYSIS

The table below represents the average daily amount of fine particulate matter in micrograms per cubic meter (PM2.5) in a county. Fine particulate matter is defined as particles of air pollutants with an aerodynamic diameter less than 2.5 micrometers. These particles can be directly emitted from sources such as forest fires, or they can form when gases emitted from power plants, industries and automobiles react in the air.

Air Pollution - Particulate matter					
	2012	2014	2016	2018	Change
Stark County	12.0	12.2	9.5	10.0	-2.0
Ohio	11.3	11.5	9.0	9.0	-2.3

More than one-tenth of the Stark County population, (11.1%), currently has asthma, an increase from 10.0% in 2015.

Stark County Estimated Prevalence of Asthma						
	2015	2016	2017	2018	2019	Change
Currently have asthma	10.0	9.7	9.9	9.5	11.1	+1.1%

SOURCE: Ohio Behavioral Risk Factor Surveillance System, Ohio Department of Health

OTHER ISSUES: SAFETY, INJURY AND VIOLENCE

COMMUNITY LEADER SURVEY

More than two-thirds of community leaders, (67.5%), agreed that “Stark County is a good place to raise a family” with 17.1% strongly agreeing. Less than one tenth, (8.1%), disagreed with this statement. More than half of community leaders, (54.4%), agreed that “Stark County is a safe place to live” with 9.6% strongly agreeing. Less than a quarter, (22.4%), disagreed.

Agreement with Statements

SECONDARY DATA ANALYSIS

Although the death rate for unintentional injuries in Stark County has increased by 14% over the past five years, the unintentional death rate for the county is significantly lower than the state.

Injury and Homicide Death Rate (death per 100,000 population)

	Stark County						Ohio					
	2017	2018	2019	2020	2021	Change	2017	2018	2019	2020	2021	Change

SOURCE: Public Children Services Association of Ohio (PCSAO,) PCSAO Factbook

The table below shows the number of youths under age 18 adjudicated for felony-level offenses over a 4-year period. The rate is the number of adjudications per 1,000 youths in the population. Overall, the number of youths adjudicated for felonies in the county declined by 19% over the four-year period while the number at the state level decreased by almost 32% over the same time.

Adolescents Adjudicated for Felonies									
	2017		2018		2019		2020		Change
	#	Rate per 1,000	#	Rate per 1,000	#	Rate per 1,000	#	Rate per 1,000	
Stark County	114	1.4	111	1.4	113	1.4	92	1.2	-19.3%
Ohio	4,496	1.7	4,195	1.6	3,365	1.4	3,075	1.3	-31.6%

The # of those under age 18 adjudicated for felony-level offenses. The rate is the number of adjudications per 1,000 adolescents in the population.

SECONDARY DATA ANALYSIS

The HIV infection rate is the number of persons with a reported diagnosis of HIV infection per 100,000 population. Although the HIV infection rate in Stark County has decreased over the past five years, it is higher than Ohio's rate.

HIV Infection Rate						
	2016	2017	2018	2019	2020	Change
Stark County	8.6	7.2	8.3	4.0	7.8	-0.8
Ohio	8.3	8.4	8.2	7.7	7.7	-0.6

The rate below depicts the number of persons living with diagnosed HIV per 100,000 population. While the rate in Stark County has increased considerably over the past five years, it is still significantly lower than the state rate.

Rate of Population Living with Diagnosed HIV Infection						
	2016	2017	2018	2019	2020	Change
Stark County	124.7	130.5	137.0	140.3	138.5	+13.8
Ohio	196.1	202.3	204.4	209.4	214.6	+18.5

The Gonorrhea rate is the number of persons per 100,000 population with Gonorrhea. In 2016, the Gonorrhea rate for Stark County was higher than the rate for the state. Since then, however, the Gonorrhea rate for Stark County has increased at a much lower rate than the state to the point that Ohio's Gonorrhea rate is now considerably higher than the county rate.

Gonorrhea Rate						
	2016	2017	2018	2019	2020	Change
Stark County	179.1	141.2	175.1	144.9	211.0	+32.0
Ohio	176.8	205.8	216.2	224.0	262.6	+85.8

The Chlamydia Rate is the number of persons per 100,000 population with Chlamydia. The Chlamydia rate for Stark County is considerably lower than the state's rate.

Chlamydia Rate						
	2016	2017	2018	2019	2020	Change
Stark County	500.0	477.0	459.5	483.8	437.9	-62.1
Ohio	521.8	526.8	543.1	561.9	504.8	-17.0

The Syphilis rate is the number of persons per 100,000 population with Syphilis. The Syphilis rate for Stark County is considerably lower than the state's rate.

Syphilis Rate						
	2016	2017	2018	2019	2020	Change
Stark County	5.4	6.7	9.2	9.4	11.9	+6.5
Ohio	13.9	16.5	16.4	17.3	20.9	+7.0

Appendix: Research Methodology

The Center for Marketing and Opinion Research (CMOR) conducted the 2022 Stark County Community Health Needs Assessment on behalf of the Stark County Health Needs Advisory Committee.

This report includes indicators in the following focus areas:

- Community Needs/Social Determinants
- Access to Health Care
- Oral Health
- Smoking/Tobacco Use
- Mental Health
- Substance Abuse
- Maternal, Infant, and Child Health
- Healthy Living
- Vaccinations and Prevention Services
- Chronic Diseases
- Transportation
- Environmental Quality
- Injury and Violence
- Reproductive and Sexual Health

**Throughout the report, statistically significant findings and statistical significance between groupings (i.e., between age groups or between races) are indicated by an asterisk (*).*

STARK POLL

The 2021 Stark County Collaborative Poll was a large-scale, random sampling survey of households in Stark County. The final sample of the poll consisted of a total of 600 respondents. The general population statistics derived from the sample size provide a precision level of plus or minus 4.0% within a 95% confidence interval.

CMOR collaborated with participating organizations to design survey questions to meet the needs of each organization. Separate reports were written by CMOR for each participating organization. In addition to the survey results for the questions posed by the organization, all reports include a Quality of Life in Stark County section as well as Demographic and Methodology sections.

Data Collection began on April 26 and ended on June 23, 2021. Most calling took place between the evening hours of 5:15 pm and 9:15 pm. Some interviews were conducted during the day and on some weekends to accommodate respondent schedules. The interviews took an average of 22.6 minutes.

COMMUNITY HEALTH LEADER SURVEY

CMOR conducted a web survey of community health leaders between May 9 and May 23, 2022. The Stark County Health Department provided CMOR with a list of 474 email addresses of potential survey respondents. Of these, 290 were valid email addresses. A total of 125 surveys were completed from the email campaign: a completion rate of 43.1%. The initial email invitation with a link to complete the online

survey was sent to the list on May 9. Survey links were customized with an embedded unique identifying number that enabled tracking of completed surveys at the individual level.

Reminder invitations were sent on May 12, 17 and 20 of 2021. Reminder invitations were not sent to email addresses that were returned as invalid or that belonged to respondents who had either completed the survey or indicated their refusal to participate. Invitations were sent at varied days of the week and times of day to facilitate a higher response rate.

The design of the survey was optimized for respondents completing via computer as well as on a mobile device such as a tablet or smart phone. A total of 13.6% surveys completed via a mobile device were included in this analysis.

SECONDARY DATA ANALYSIS

Another phase of the project consisted of reviewing and analyzing secondary data sources to identify priority areas of concern when analyzed alongside survey data. CMOR gathered and compiled health and demographic data from various sources (outlined below). After gathering the data, CMOR compiled the information, by category. In addition to the report narrative, data was visually displayed with charts and tables. When available, data was compared to previous five year's information as well as other geographic areas such as Ohio. Analysis included survey data in conjunction with health and demographic data. Using all data available, CMOR identified priorities for the county.

The 2021 Northeast Ohio Youth Health Survey was an anonymous online survey of 15,083 students from 18 Stark County school districts. All students were in 7th-12th grade. The survey was administered in the Fall of 2021.

MATERNAL HEALTH COMMUNITY FOCUS GROUP

The Center for Marketing and Opinion Research (CMOR) on behalf of Stark County Health Department conducted a focus group on August 25, 2021, to collect qualitative data to help collect information to assist in the evaluation of the Maternal Child Health Grant. Participants all where women ages 18 to 44 who lived in Stark County. The group consisted of participants of different races and backgrounds, with and without children, and living in urban, suburban and rural areas. The focus groups were moderated by CMOR. The focus group was conducted at the Stark County Health Department.

VOICES OF STARK COUNTY

The Voices of Stark County Report consisted of data from six community meetings and 15 small focus groups. A total of 167 individuals participated. The Voices of Stark County Report was compiled by the Behavioral Health Access and Integration Collaborative and supported by Stark Mental Health and Addiction Recovery, Aultman Health Foundation, and the Stark County Educational Service Center. The Behavioral Health Access and Integration Collaborative is a coordinated county-wide initiative that aims to address socioeconomic barriers to access and create and implement targeted interventions to increase access entry points throughout the community. The purpose of this report was to identify barriers to access.
